<tr>
<td><strong>Product name</strong></td>
<td>Anti-Caspase-3 antibody [E87]</td>
</tr>
<tr>
<td><strong>Description</strong></td>
<td>Rabbit monoclonal [E87] to Caspase-3</td>
</tr>
<tr>
<td><strong>Host species</strong></td>
<td>Rabbit</td>
</tr>
<tr>
<td><strong>Specificity</strong></td>
<td>This antibody is specific for the pro form and the p17 cleaved form of human Caspase-3.</td>
</tr>
<tr>
<td><strong>Tested applications</strong></td>
<td><strong>Suitable for</strong>: ICC/IF, WB, IHC-P, Flow Cyt, IP</td>
</tr>
<tr>
<td><strong>Species reactivity</strong></td>
<td><strong>Reacts with</strong>: Human</td>
</tr>
<tr>
<td><strong>Immunogen</strong></td>
<td>Synthetic peptide (the amino acid sequence is considered to be commercially sensitive) corresponding to Human Caspase-3 aa 50-150. Database link: P42574</td>
</tr>
<tr>
<td><strong>Positive control</strong></td>
<td>WB: Jurkat cell lysate. IHC-P: Cervical carcinoma tissue slides. Flow Cyt: HeLa cells.</td>
</tr>
<tr>
<td><strong>General notes</strong></td>
<td>This product is a recombinant rabbit monoclonal antibody. A trial size is available to purchase for this antibody. Rat reactivity: We have preliminary internal testing data indicating this antibody does not react with mouse caspase 3. Internal testing and customer reports also indicate non-reactivity with rat caspase 3, contrary to earlier positive reports. Please contact us for more information.</td>
</tr>
</tbody>
</table>

Our RabMAb® technology is a patented hybridoma-based technology for making rabbit monoclonal antibodies. For details on our patents, please refer to RabMAb® patents

We are constantly working hard to ensure we provide our customers with best in class antibodies. As a result of this work we are pleased to now offer this antibody in purified format. We are in the process of updating our datasheets. The purified format is designated 'PUR' on our product labels. If you have any questions regarding this update, please contact our Scientific Support team.

</tbody>
</table>
Storage buffer
pH: 7.20
Preservative: 0.01% Sodium azide
Constituents: 59% PBS, 40% Glycerol, 0.05% BSA

Purity
Protein A purified

Clonality
Monoclonal

Clone number
E87

Isotype
IgG

Applications

Our Abpromise guarantee covers the use of ab32351 in the following tested applications.
The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Target

Function
Involved in the activation cascade of caspases responsible for apoptosis execution. At the onset of apoptosis it proteolytically cleaves poly(ADP-ribose) polymerase (PARP) at a '216-Asp-Gly-217' bond. Cleave and activates sterol regulatory element binding proteins (SREBPs) between the basic helix-loop-helix leucine zipper domain and the membrane attachment domain. Cleave and activates caspase-6, -7 and -9. Involved in the cleavage of huntingtin.

Tissue specificity
Highly expressed in lung, spleen, heart, liver and kidney. Moderate levels in brain and skeletal muscle, and low in testis. Also found in many cell lines, highest expression in cells of the immune system.

Sequence similarities
Belongs to the peptidase C14A family.

Post-translational modifications
Cleave by granzyme B, caspase-6, caspase-8 and caspase-10 generates the two active subunits. Additional processing of the propeptides is likely due to the autocatalytic activity of the activated protease. Active heterodimers between the small subunit of caspase-7 protease and the large subunit of caspase-3 also occur and vice versa.
S-nitrosylated on its catalytic site cysteine in unstimulated human cell lines and denitrosylated upon activation of the Fas apoptotic pathway, associated with an increase in intracellular caspase activity. Fas therefore activates caspase-3 not only by inducing the cleavage of the caspase zymogen to its active subunits, but also by stimulating the denitrosylation of its active
Cellular localization

Cytoplasm.

Images

Immunofluorescence staining of Jurkat cells with purified ab32351 at a working dilution of 1/500, counter-stained with DAPI. The secondary antibody was Alexa Fluor® 488 goat anti-rabbit (ab150077), used at a dilution of 1/1000. ab7291, a mouse anti-tubulin antibody (1/1000), was used to stain tubulin along with ab150120 (Alexa Fluor® 594 goat anti-mouse, 1/1000), shown in the top right hand panel. The cells were fixed in 4% PFA and permeabilized using 0.1% Triton X 100. The negative controls are shown in bottom middle and right hand panels - for negative control 1, purified ab32351 was used at a dilution of 1/500 followed by an Alexa Fluor® 594 goat anti-mouse antibody (ab150120) at a dilution of 1/500. For negative control 2, ab7291 (mouse anti-tubulin) was used at a dilution of 1/500 followed by an Alexa Fluor® 488 goat anti-rabbit antibody (ab150077) at a dilution of 1/400.

Unpurified ab32351, at a 1/25 dilution, staining Caspase-3 in paraffin embedded human cervical carcinoma tissue by Immunohistochemistry.
Western blot - Anti-Caspase-3 antibody [E87] (ab32351)

**All lanes**: Anti-Caspase-3 antibody [E87] (ab32351) at 1/5000 dilution (purified)

**Lane 1**: untreated Jurkat cell lysate

**Lane 2**: Jurkat treated with staurosporine

Lysates/proteins at 10 µg per lane.

**Secondary**

**All lanes**: HRP goat anti-rabbit IgG (H+L) at 1/1000 dilution

**Predicted band size**: 32 kDa

**Observed band size**: 17,35 kDa

Blocking buffer: 5% NFDM/TBST

Dilution buffer: 5% NFDM/TBST

---

Western blot - Anti-Caspase-3 antibody [E87] (ab32351)

**All lanes**: Anti-Caspase-3 antibody [E87] (ab32351) at 1/5000 dilution (purified)

**Lane 1**: Ramos cell lysate

**Lane 2**: HEK293 cell lysate

Lysates/proteins at 20 µg per lane.

**Secondary**

**All lanes**: HRP goat anti-rabbit IgG (H+L) at 1/1000 dilution

**Predicted band size**: 32 kDa

**Observed band size**: 35 kDa

Blocking buffer: 5% NFDM/TBST

Dilution buffer: 5% NFDM/TBST
Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-Caspase-3 antibody [E87] (ab32351)

Immunohistochemical staining of paraffin embedded human tonsil with purified ab32351 at a working dilution of 1/100. The secondary antibody used is HRP goat anti-rabbit IgG H&L (ab97051) at 1/500. The sample is counter-stained with hematoxylin. Antigen retrieval was performed using Tris-EDTA buffer, pH 9.0. PBS was used instead of the primary antibody as the negative control, and is shown in the inset.

Immunoprecipitation - Anti-Caspase-3 antibody [E87] (ab32351)

ab32351 (purified) at 1/50 immunoprecipitating Cullin 1 in 10 μg HeLa whole cell lysate (Lanes 1 and 2, observed at 35 kDa). Lane 3 - PBS. For western blotting, VeriBlot for IP (HRP) (ab131366) was used as the secondary antibody (1/1500). Blocking buffer and concentration: 5% NFDM/TBST
Dilution buffer and concentration: 5% NFDM/TBST

Flow Cytometry - Anti-Caspase-3 antibody [E87] (ab32351)

Overlay histogram showing Ramos cells fixed in 4% PFA and stained with purified ab32351 at a dilution of 1 in 180 (red line). The secondary antibody used was FITC goat anti-rabbit at a dilution of 1 in 500. Rabbit monoclonal IgG was used as an isotype control (black line) and cells incubated in the absence of both primary and secondary antibody were used as a negative control (blue line).
Western blot - Anti-Caspase-3 antibody [E87] (ab32351)

Carried out with unpurified antibody. Lane 1 = Caspase 3 protein (Active) (ab52314) ? 20 ng. Lane 2 = Caspase 9 protein (Active) (ab52203) ? 20 ng. Lane 3 = Extract of HeLa cells treated with vehicle (ab136806) ? 20 ug. Lane 4 = Extract of HeLa cells treated with staurosporine (ab136806) ? 20 ug. SDS PAGE performed under reducing conditions (100 mM DTT ? Sample heated at 50?C). Primary : Lanes 1-4: Anti Caspase 3 antibody (ab32351) at 1:1000 dilution. Secondary : Lanes 1-4: Goat anti rabbit IgG(H&L)-HRP at 1:10000. Development: ECL for 10 min exposure. Blocking: in 5% Milk + PBS overnight at 4 C. Primary antibody: in 5% Milk + PBS for 2 hours at RT. Secondary antibody: in 5% Milk + PBS for 2 hours at RT. Predicted band size : 32 kDa and 17 kDa. Observed band size : 32 kDa and 17 kDa.

Overlay histogram showing HeLa cells stained with unpurified ab32351 (red line). The cells were fixed with 80% methanol (5 min) and then permeabilized with 0.1% PBS-Tween for 20 min. The cells were then incubated in 1x PBS / 10% normal goat serum / 0.3M glycine to block non-specific protein-protein interactions followed by the antibody (ab32351, 1/1000 dilution) for 30 min at 22ºC. The secondary antibody used was Alexa Fluor® 488 goat anti-rabbit IgG (H&L) (ab150081) at 1/2000 dilution for 30 min at 22ºC. The isotype control antibody (black line) was rabbit IgG (monoclonal) (ab172730, 0.1μg/1x10⁸ cells) used under the same conditions. Unlabelled sample (blue line) was also used as a control.

Acquisition of >5,000 events were collected using a 20mW Argon ion laser (488nm) and 525/30 bandpass filter.

Please note: All products are "FOR RESEARCH USE ONLY AND ARE NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE"
Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit [http://www.abcam.com/abpromise](http://www.abcam.com/abpromise) or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
