

Product datasheet

Anti-Integrin beta 8 antibody ab80673

★★★★☆ 4 Abreviews 2 References 2 Images

Overview

Product name	Anti-Integrin beta 8 antibody
Description	Rabbit polyclonal to Integrin beta 8
Tested applications	Suitable for: ELISA, IHC-P, WB
Species reactivity	Reacts with: Rat, Human Predicted to work with: Mouse, Rabbit, Horse, Guinea pig, Cow, Cat, Dog, Pig
Immunogen	Synthetic peptide: CECTDPRSIG RFCEHCPTCY TACKENWNCM QCLHPHNSQ AILDQCKTSC , corresponding to C terminal amino acids 611-660 of Human Integrin beta 8 (accession number: NP_002205) Run BLAST with ExPASy Run BLAST with NCBI
Positive control	Human placenta membrane lysate This antibody gave a positive result in IHC in the following FFPE tissue: Human normal placenta.

Properties

Form	Liquid
Storage instructions	Shipped at 4°C. Store at +4°C short term (1-2 weeks). Upon delivery aliquot. Store at -20°C. Avoid freeze / thaw cycle.
Storage buffer	Constituents: 2% Sucrose, 98% PBS
Purity	Immunogen affinity purified
Clonality	Polyclonal
Isotype	IgG

Applications

Our [Abpromise guarantee](#) covers the use of **ab80673** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
ELISA		Use at an assay dependent concentration. Only Peptide ELISA tested

Application	Abreviews	Notes
IHC-P	★★★★☆	Use a concentration of 1 µg/ml.
WB	★★★★☆	Use a concentration of 1 µg/ml. Detects a band of approximately 81 kDa. Good results were obtained when blocked with 5% non-fat dry milk in 0.05% PBS-T.

Target

Function	Integrin alpha-V/beta-8 is a receptor for fibronectin.
Tissue specificity	Placenta, kidney, brain, ovary, uterus and in several transformed cells. Transiently expressed in 293 human embryonic kidney cells.
Sequence similarities	Belongs to the integrin beta chain family. Contains 1 VWFA domain.
Cellular localization	Membrane.

Images

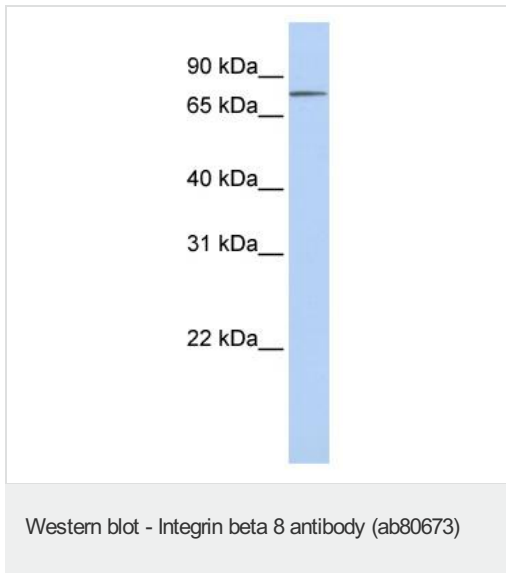

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-Integrin beta 8 antibody (ab80673)

IHC image of Integrin beta 8 staining in human placenta formalin fixed paraffin embedded tissue section*, performed on a Leica Bond™ system using the standard protocol F. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH6, epitope retrieval solution 1) for 20 mins. The section was then incubated with ab80673, 1 µg/ml, for 15 mins at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

For other IHC staining systems (automated and non-automated) customers should optimize variable parameters such as antigen retrieval conditions, primary antibody concentration and antibody incubation times.

*Tissue obtained from the Human Research Tissue Bank, supported by the NIHR Cambridge Biomedical Research Centre

Anti-Integrin beta 8 antibody (ab80673) at 1 μ g/ml + Placenta lysate at 10 μ g

Secondary

HRP conjugated anti-Rabbit IgG at 1/50000 dilution

Observed band size : 81 kDa

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <http://www.abcam.com/abpromise> or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
