Applications

Our [Abpromise guarantee](#) covers the use of **ab85231** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
WB		1/50 - 1/100. Detects a band of approximately 49 kDa (predicted molecular weight: 49 kDa).
ELISA		1/1000.

Target

Function	Inhibits human amidolytic and kininogenase activities of tissue kallikrein. Inhibition is achieved by formation of an equimolar, heat- and SDS-stable complex between the inhibitor and the enzyme, and generation of a small C-terminal fragment of the inhibitor due to cleavage at the reactive site by tissue kallikrein.
Tissue specificity	Expressed by the liver and secreted in plasma.
Sequence similarities	Belongs to the serpin family.
Post-translational modifications	The N-terminus is blocked.
Cellular localization	Secreted.
