Target

Relevance

Neurotensin receptor 1 belongs to the large superfamily of G-protein coupled receptors. NTSR1 mediates the multiple functions of neurotensin, such as hypotension, hyperglycemia, hypothermia, antinociception, and regulation of intestinal motility and secretion. NTR1 has been reported in brain, pancreas, and small intestine. ESTs have been isolated from brain and colon libraries.

Cellular localization

Cell Membrane, Endoplasmic reticulum, Golgi Apparatus and Plasma membrane. Integral membrane protein.
