Product datasheet

Anti-PDGF Receptor alpha antibody [APA5] ab90967

5 References 1 Image

Overview

Product name  Anti-PDGF Receptor alpha antibody [APA5]
Description  Rat monoclonal [APA5] to PDGF Receptor alpha
Host species  Rat
Tested applications  Suitable for: WB, IHC-Fr, Flow Cyt
Species reactivity  Reacts with: Mouse
Immunogen  Fusion protein corresponding to Mouse PDGF Receptor alpha (extracellular). Fusion protein containing the extracellular domain of Mouse PDGF Receptor alpha and the Fc portion of Human IgG1 purified from the culture supernatant of transfected COS1 cells
Positive control  NIH3T3 cells

Properties

Form  Liquid
Storage instructions  Shipped at 4°C. Store at +4°C short term (1-2 weeks). Store at -20°C or -80°C. Avoid freeze / thaw cycle.
Storage buffer  Preservative: 0.09% Sodium Azide
Constituents: PBS, 150mM Sodium chloride, pH 7.2
Purity  Protein A purified
Clonality  Monoclonal
Clone number  APA5
Isotype  IgG2a
Light chain type  kappa

Applications

Our Abpromise guarantee covers the use of ab90967 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.
Application notes

Flow Cyt: Use 1µg for 10^6 cells in a 100 µl total staining volume.
IHC-Fr: Use at an assay dependent dilution.

Not yet tested in other applications.
Optimal dilutions/concentrations should be determined by the end user.

Target

Function
Receptor that binds both PDGFA and PDGFB and has a tyrosine-protein kinase activity.

Tissue specificity
Expressed in primary and metastatic colon tumors and in normal colon tissue. Tumors may express a different isoform to that found in normal tissue.

Involvement in disease
Note=A chromosomal aberration involving PDGFRA is found in some cases of hypereosinophilic syndrome. Interstitial chromosomal deletion del(4)(q12q12) causes the fusion of FIP1L1 and PDGFRA (FIP1L1-PDGFRA).

Sequence similarities
Belongs to the protein kinase superfamily. Tyr protein kinase family. CSF-1/PDGF receptor subfamily.
Contains 5 Ig-like C2-type (immunoglobulin-like) domains.
Contains 1 protein kinase domain.

Cellular localization
Membrane.

Images

Staining of NIH/3T3 cells with 0.5 µg Rat IgG2a control antibody (open histogram) or 0.5 µg of ab90967 (colored histogram) followed by Biotin Anti-Rat IgG secondary antibody. Total viable cells were analysed.

Please note: All products are "FOR RESEARCH USE ONLY AND ARE NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE"

Our Abpromise to you: Quality guaranteed and expert technical support
Replacement or refund for products not performing as stated on the datasheet
Valid for 12 months from date of delivery
Response to your inquiry within 24 hours

- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit [http://www.abcam.com/abpromise](http://www.abcam.com/abpromise) or contact our technical team.

**Terms and conditions**

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
