Applications

Our [Abpromise guarantee](#) covers the use of **ab69882** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes

WB

Application notes	WB: 1/500 - 1/1000. Detects bands of approximately 34 and 36 kDa (predicted molecular weight: 34 kDa). Not yet tested in other applications. Optimal dilutions/concentrations should be determined by the end user.

Target

Function	Removes thioester-linked fatty acyl groups from various substrates including S-palmitoyl-CoA. Has the highest S-thioesterase activity for the acyl groups palmitic and myristic acid followed by other short- and long-chain acyl substrates. However, because of structural constraints, is unable to remove palmitate from peptides or proteins.
Tissue specificity	Broadly expressed, with highest levels in skeletal muscle.
Sequence similarities	Belongs to the palmitoyl-protein thioesterase family.
Cellular localization	Lysosome.
