

Product datasheet

Optiblot Reducing SDS Run Buffer (20X) ab119195

★★★★★ 1 Abreviews

Overview

Product name Optiblot Reducing SDS Run Buffer (20X)

General notes Optiblot Reducing SDS Run Buffer has been specifically designed and formulated for use with Optiblot gels to provide the best running conditions and optimal sample resolution. Based on a Tris-MOPS buffer system this run buffer provides excellent band resolution and fast run time. A 10% Optiblot gel will be run to completion within 35 minutes. Separation pattern is similar to that produced by a conventional MES buffer system.

Optiblot gels must be used with Optiblot buffers

Buffer recipes are available in the protocol tab.

Properties

Storage instructions Store at room temperature.

Storage buffer pH: 8.25
Constituents: 2.47% Sodium bisulfite, 15% Tris, 2% SDS, 12.5% MOPS
Note: pH range 8.2-8.3 @ 25°C

Please note: All products are "FOR RESEARCH USE ONLY AND ARE NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours

- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <http://www.abcam.com/abpromise> or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
