

Product datasheet

# Anti-SARS spike glycoprotein antibody ab22156

1 Image

Overview

<b>Product name</b>	Anti-SARS spike glycoprotein antibody
<b>Description</b>	Rabbit polyclonal to SARS spike glycoprotein
<b>Host species</b>	Rabbit
<b>Specificity</b>	ab22156 specifically detects the N-terminal portion of human coronavirus SARS Spike protein.
<b>Tested applications</b>	<b>Suitable for:</b> WB, ELISA
<b>Immunogen</b>	Synthetic peptide: T TFDDVQAPNY TQHTS , corresponding to amino acids 19-35 of SARS spike glycoprotein.
	<a href="#">Run BLAST with</a> <a href="#">Run BLAST with</a>

Properties

<b>Form</b>	Liquid
<b>Storage instructions</b>	Shipped at 4°C. Store at +4°C short term (1-2 weeks). Upon delivery aliquot. Store at -20°C long term.
<b>Storage buffer</b>	Preservative: 0.05% Sodium Azide Constituents: 0.2% Gelatin, PBS
<b>Purity</b>	Protein G purified
<b>Clonality</b>	Polyclonal
<b>Isotype</b>	IgG

Applications

Our [Abpromise guarantee](#) covers the use of **ab22156** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
WB		Use a concentration of 0.5 - 2 µg/ml. Predicted molecular weight: 139 kDa.
ELISA		Use a concentration of 0.5 - 2 µg/ml.

## Target

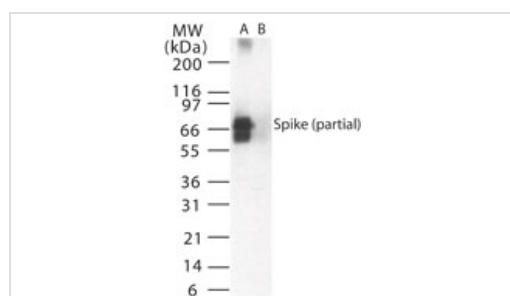

---

### Relevance

A novel coronavirus has been identified as the causative agent of SARS (Severe Acute Respiratory Syndrome). Coronaviruses are a major cause of upper respiratory diseases in humans. The genomes of these viruses are positive stranded RNA approximately 27 to 31kb in length. SARS infection can be mediated by the binding of the viral spike protein, a glycosylated 139 kDa protein and the major surface antigen of the virus, to the angiotensin converting enzyme 2 (ACE2) on target cells. This binding can be blocked by a soluble form of ACE2.

## Images

---

Western blot - SARS spike glycoprotein antibody (ab22156)

**All lanes :** Anti-SARS spike glycoprotein antibody (ab22156) at 0.5 µg/ml

**Lane 1 :** Mouse melanoma cell lysate transfected with a partial-length cDNA coding for the N-terminal portion of SARS Spike protein [predicted molecular weight 68 kDa]

**Lane 2 :** Untransfected mouse melanoma cell lysate

**Predicted band size:** 139 kDa

**Observed band size:** 68 kDa

**Please note:** All products are "FOR RESEARCH USE ONLY AND ARE NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE"

## Our Abpromise to you: Quality guaranteed and expert technical support

---

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <http://www.abcam.com/abpromise> or contact our technical team.

## Terms and conditions

---

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
