### Applications

Our [Abpromise guarantee](#) covers the use of **ab57828** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
-------------	-----------	-------

Application	Abreviews	Notes
WB		Use a concentration of 1 - 5 µg/ml. This antibody has only been tested in WB against the recombinant fragment used as immunogen. We have no data on the detection of endogenous protein.
ICC/IF	★ ★ ★ ★ ★	Use at an assay dependent concentration. PubMed: 22383705

## Target

<b>Function</b>	Binds double-stranded RNA (regardless of the sequence) and tubulin. May play a role in specific positioning of mRNAs at given sites in the cell by cross-linking cytoskeletal and RNA components, and in stimulating their translation at the site.
<b>Tissue specificity</b>	Widely expressed. Expressed in brain, pancreas, heart, skeletal muscles, liver, lung, kidney and placenta.
<b>Sequence similarities</b>	Contains 3 DRBM (double-stranded RNA-binding) domains.
<b>Domain</b>	One of the DRDB could be involved in RER binding. The C-terminal contains the tubulin binding domain (TBD).
<b>Cellular localization</b>	Cytoplasm. Rough endoplasmic reticulum. Localizes exclusively with the rough reticulum endoplasmic.
