

Product datasheet

# Anti-M6PR (cation independent) antibody ab61774

2 Images

Overview

<b>Product name</b>	Anti-M6PR (cation independent) antibody
<b>Description</b>	Rabbit polyclonal to M6PR (cation independent)
<b>Host species</b>	Rabbit
<b>Specificity</b>	ab61774 detects endogenous levels of total Mannose 6 Phosphate Receptor (Cation independent) protein.
<b>Tested applications</b>	<b>Suitable for:</b> IHC-P, ELISA, ICC/IF
<b>Species reactivity</b>	<b>Reacts with:</b> Human <b>Predicted to work with:</b> Mouse 
<b>Immunogen</b>	Synthetic non-phosphopeptide derived from human Mannose 6 Phosphate Receptor (Cation independent) around the phosphorylation site of serine 2484 (D-D-S-D-E).
<b>Positive control</b>	Human lung carcinoma tissue, 293 cell extracts and HeLa cells.

Properties

<b>Form</b>	Liquid
<b>Storage instructions</b>	Shipped at 4°C. Store at -20°C. Stable for 12 months at -20°C.
<b>Storage buffer</b>	Preservative: 0.02% Sodium Azide Constituents: 50% Glycerol, PBS (without Mg <sup>2+</sup> and Ca <sup>2+</sup> ), 150mM Sodium chloride, pH 7.4
<b>Purity</b>	Immunogen affinity purified
<b>Clonality</b>	Polyclonal
<b>Isotype</b>	IgG

Applications

Our [Abpromise guarantee](#) covers the use of **ab61774** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

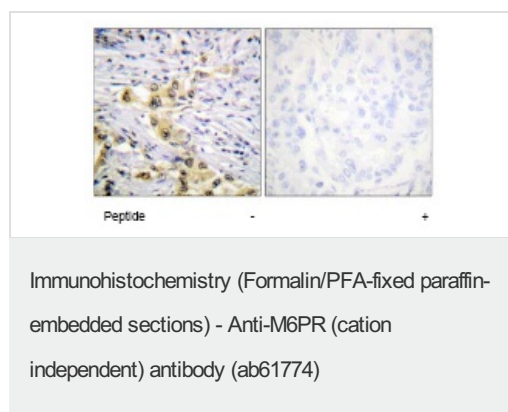

Application	Abreviews	Notes
IHC-P		1/50 - 1/100.

Application	Abreviews	Notes
ELISA		1/20000.
ICC/IF		1/500 - 1/1000.

## Target

<b>Function</b>	Transport of phosphorylated lysosomal enzymes from the Golgi complex and the cell surface to lysosomes. Lysosomal enzymes bearing phosphomannosyl residues bind specifically to mannose-6-phosphate receptors in the Golgi apparatus and the resulting receptor-ligand complex is transported to an acidic prelysosomal compartment where the low pH mediates the dissociation of the complex. This receptor also binds IGF2. Acts as a positive regulator of T-cell coactivation, by binding DPP4.
<b>Sequence similarities</b>	Belongs to the MRL1/IGF2R family. Contains 1 fibronectin type-II domain.
<b>Domain</b>	Contains 15 repeating units of approximately 147 AA harboring four disulfide bonds each. The most highly conserved region within the repeat consists of a stretch of 13 AA that contains cysteines at both ends.
<b>Cellular localization</b>	Lysosome membrane. Colocalized with DPP4 in internalized cytoplasmic vesicles adjacent to the cell surface.

## Images

ab61774 at 1/50 - 1/100 dilution staining Mannose 6 Phosphate (Cation independent) in human lung carcinoma by Immunohistochemistry, Paraffin-embedded tissue, in the absence or presence of the immunising peptide.

ab61774 at 1/500 - 1/1000 dilution staining Mannose 6 Phosphate Receptor (Cation independent) in HeLa cells by Immunofluorescence, in the absence or presence of the immunising peptide.

### **Our Abpromise to you: Quality guaranteed and expert technical support**

---

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
  
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <http://www.abcam.com/abpromise> or contact our technical team.

### **Terms and conditions**

---

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
