Product datasheet

APC Anti-CD105 antibody [MEM-226], prediluted ab60902

4 References

Overview

Product name APC Anti-CD105 antibody [MEM-226], prediluted

Description APC Mouse monoclonal [MEM-226] to CD105, prediluted

Host species Mouse

Conjugation APC. Ex: 645nm, Em: 660nm

Tested applications
Suitable for: Flow Cyt
Species reactivity
Reacts with: Human

Immunogen Recombinant Vaccinia virus containing the human CD105 cDNA.

General notes

The Life Science industry has been in the grine of a reproducibility crisis for a

Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets

The Life Science industry has been in the grips of a reproducibility crisis for a number of years.

your needs before purchasing.

If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be

found below, along with publications, customer reviews and Q&As

Properties

Form Liquid

Storage instructions Shipped at 4°C. Store at +4°C.

Storage buffer pH: 7.4

Preservative: 0.097% Sodium azide Constituents: PBS, 0.2% BSA

Purity Size exclusion

Purification notes The antibody was purified by Protein A (G) affinity chromatography before conjugation. The

conjugate was purified by size-exclusion chromatography and adjusted for direct use.

Clonality Monoclonal
Clone number MEM-226

Isotype IgG2a

1

Applications

The Abpromise guarantee

Our Abpromise guarantee covers the use of ab60902 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

| Application | Abreviews | Notes |
|-------------|-----------|---|
| Flow Cyt | | Use at an assay dependent concentration. Use 10ul per 100ul of whole blood or 10^6 cells in a suspension. ab91364 - Mouse monoclonal lgG2a, is suitable for use as an isotype control with this antibody. |

Target

| Function Major glycoprotein of vascular endothelium. May play a critical role in the binding of endothelium. | elial |
|---|-------|
|---|-------|

cells to integrins and/or other RGD receptors.

Tissue specificity Endoglin is restricted to endothelial cells in all tissues except bone marrow.

Involvement in disease Defects in ENG are the cause of hereditary hemorrhagic telangiectasia type 1 (HHT1)

[MIM:187300, 108010]; also known as Osler-Rendu-Weber syndrome 1 (ORW1). HHT1 is an autosomal dominant multisystemic vascular dysplasia, characterized by recurrent epistaxis, muco-cutaneous telangiectases, gastro-intestinal hemorrhage, and pulmonary (PAVM), cerebral (CAVM) and hepatic arteriovenous malformations; all secondary manifestations of the underlying vascular dysplasia. Although the first symptom of HHT1 in children is generally nose bleed, there

is an important clinical heterogeneity.

Cellular localization Membrane.

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

• Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
