

# Anti-Feline Calicivirus antibody [FCV1-43] ab33990

## 3 References

### Overview

---

<b>Product name</b>	Anti-Feline Calicivirus antibody [FCV1-43]
<b>Description</b>	Mouse monoclonal [FCV1-43] to Feline Calicivirus
<b>Host species</b>	Mouse
<b>Specificity</b>	ab33990 specifically recognises feline calicivirus, and does not cross-react with FIV or FeLV.
<b>Tested applications</b>	<b>Suitable for:</b> IHC-P, WB, ELISA
<b>Species reactivity</b>	<b>Reacts with:</b> Feline calicivirus
<b>Immunogen</b>	The details of the immunogen for this antibody are not available.

### General notes

The antibody detects a 63kD band in Western blots, representing the viral capsid protein.

The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.

If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As

### Properties

---

<b>Form</b>	Liquid
<b>Storage instructions</b>	Shipped at 4°C. Store at +4°C short term (1-2 weeks). Upon delivery aliquot. Store at -20°C long term.
<b>Storage buffer</b>	pH: 7.20 Preservative: 0.09% Sodium azide Constituent: PBS
<b>Purity</b>	Protein A purified
<b>Primary antibody notes</b>	The antibody detects a 63kD band in Western blots, representing the viral capsid protein.
<b>Clonality</b>	Monoclonal
<b>Clone number</b>	FCV1-43
<b>Isotype</b>	IgG2a

## Applications

---

**The Abpromise guarantee** Our **Abpromise guarantee** covers the use of ab33990 in the following tested applications. The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
IHC-P		Use at an assay dependent concentration. Perform heat mediated antigen retrieval before commencing with IHC staining protocol.
WB		Use at an assay dependent concentration. Detects a band of approximately 63 kDa.
ELISA		Use at an assay dependent concentration.

## Target

---

**Relevance** Feline calicivirus is a common viral disease that affects cats. It is characterized by upper respiratory symptoms, pneumonia, oral ulceration, and occasionally arthritis. It is a fairly mild flu-like condition and rarely causes serious complications. FCV is a tiny non-enveloped virus consisting of a 20 sided protein capsid (that fashions cup like dimples) surrounding a single strand of positive sense RNA.

**Please note:** All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

## Our Abpromise to you: Quality guaranteed and expert technical support

---

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <https://www.abcam.com/abpromise> or contact our technical team.

## Terms and conditions

---

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
