the preparation. The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodie and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing. If you have any questions, special requirements or concerns, please send us an inquiry and/or				
Host species   Mouse     Conjugation   FITC. Ex: 493nm, Em: 528nm     Tested applications   Suitable for: Flow Cyt     Species reactivity   Reacts with: Human     Predicted to work with: Chimpanzee   Predicted to work with: Chimpanzee     Positive control   Human peripheral blood lymphocytes.     General notes   The purified antibody was conjugated under optimal conditions, with unreacted dye removed from the preparation.     The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antbodic and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.     Fyou have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support leam ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As     Properties   Iquid     Storage instructions   Shipped at 4°C. Store at +4°C. Store In the Dark.     Storage buffer   pH: 7.20     Preservative: 0.09% Sodium azide Constituents: 0.87% Sodium chloride, 0.12% Monobasic dihydrogen sodium phosphate, 0.1% Gelatin     Purty   Protein A purified	Product name	FITC Anti-CD45RO antibody [UCHL1]		
Conjugation   FITC. Ex: 493nm, Em: 528nm     Tested applications   Suitable for: Flow Cyt     Species reactivity   Reacts with: Human     Predicted to work with: Chimpanzee   Image: Chimpanzee     Positive control   Human peripheral blood lymphocytes.     General notes   The purified antibody was conjugated under optimal conditions, with unreacted dye removed from the preparation.     The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodie and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.     Properties   If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As     Properties   Inquid     Storage buffer   Ph: 7.20 Preservative: 0.09% Sodium azide Constituents: 0.87% Sodium chloride, 0.12% Monobasic dihydrogen sodium phosphate, 0.1% Gelatin     Purity   Protein A purified	Description	FITC Mouse monoclonal [UCHL1] to CD45RO		
Tested applications   Suitable for: Flow Cyt     Species reactivity   Reacts with: Human     Prositive control   Human peripheral blood lymphocytes.     General notes   The purified antibody was conjugated under optimal conditions, with unreacted dye removed from the preparation.     The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodie and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.     Fryou have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As     Properties   Liquid     Storage instructions   Shipped at 4°C. Store at +4°C. Store In the Dark.     Storage buffer   pH: 7.20 Preservative: 0.09% Sodium azide Constituents: 0.87% Sodium chloride, 0.12% Monobasic dihydrogen sodium phosphate, 0.1% Geldtin     Purity   Protein A purified	Host species	Mouse		
Species reactivity   Reacts with: Human     Positive control   Human peripheral blood lymphocytes.     General notes   The purified antibody was conjugated under optimal conditions, with unreacted dye removed from the preparation.     The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibody and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.     Froperties   If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As     Properties   Equivid     Storage instructions   Shipped at 4°C. Store at +4°C. Store In the Dark.     Storage buffer   pH: 7.20     Preservative: 0.09% Sodium azide     Constituents: 0.87% Sodium chloride, 0.12% Monobasic dihydrogen sodium phosphate, 0.1%     Gelatin     Purity   Protein A purified	Conjugation	FITC. Ex: 493nm, Em: 528nm		
Predicted to work with: Chimpanzee   ▲     Positive control   Human peripheral blood lymphocytes.     General notes   The purified antibody was conjugated under optimal conditions, with unreacted dye removed from the preparation.     The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodie and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.     If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As     Properties   I     Form   Liquid     Storage buffer   pH: 7.20 Preservative: 0.09% Sodium azide Constituents: 0.87% Sodium chloride, 0.12% Monobasic dihydrogen sodium phosphate, 0.1% Gelatin     Purity   Protein A purified	Tested applications	Suitable for: Flow Cyt		
Positive control   Human peripheral blood lymphocytes.     General notes   The purified antibody was conjugated under optimal conditions, with unreacted dye removed from the preparation.     The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodie and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing. 	Purification notes	ab210385 was purified from tissue culture supernatant via affinity chromatography.		

Monoclonal

UCHL1

lsotype	lgG2a
Light chain type	kappa

#### Applications

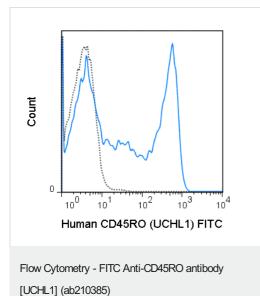

#### The Abpromise guarantee Our <u>Abpromise guarantee</u> covers the use of ab210385 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
Flow Cyt		Use 5µl for $10^{5-8}$ cells. in 100 µl volume.

Target	
Function	Protein tyrosine-protein phosphatase required for T-cell activation through the antigen receptor. Acts as a positive regulator of T-cell coactivation upon binding to DPP4. The first PTPase domain has enzymatic activity, while the second one seems to affect the substrate specificity of the first one. Upon T-cell activation, recruits and dephosphorylates SKAP1 and FYN. Dephosphorylates LYN, and thereby modulates LYN activity.
Involvement in disease	Defects in PTPRC are a cause of severe combined immunodeficiency autosomal recessive T- cell-negative/B-cell-positive/NK-cell-positive (T(-)B(+)NK(+) SCID) [MIM:608971]. A form of severe combined immunodeficiency (SCID), a genetically and clinically heterogeneous group of rare congenital disorders characterized by impairment of both humoral and cell-mediated immunity, leukopenia, and low or absent antibody levels. Patients present in infancy recurrent, persistent infections by opportunistic organisms. The common characteristic of all types of SCID is absence of T-cell-mediated cellular immunity due to a defect in T-cell development. Genetic variations in PTPRC are involved in multiple sclerosis susceptibility (MS) [MIM:126200]. MS is a neurodegenerative disorder characterized by the gradual accumulation of focal plaques of demyelination particularly in the periventricular areas of the brain. Peripheral nerves are not affected. Onset usually in third or fourth decade with intermittent progression over an extended period. The cause is still uncertain.
Sequence similarities	Belongs to the protein-tyrosine phosphatase family. Receptor class 1/6 subfamily. Contains 2 fibronectin type-III domains. Contains 2 tyrosine-protein phosphatase domains.
Domain	The first PTPase domain interacts with SKAP1.
Post-translational modifications	Heavily N- and O-glycosylated.

Images

Flow cytometric analysis of Human peripheral blood lymphocytes labeling CD45RO with 5  $\mu$ l (1  $\mu$ g) of ab210385 (solid line) or 1  $\mu$ g of FITC Mouse lgG2a isotype control (dashed line).

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

#### Our Abpromise to you: Quality guaranteed and expert technical support

- · Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- · We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <u>https://www.abcam.com/abpromise</u> or contact our technical team.

#### **Terms and conditions**

• Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
