Product datasheet

Anti-Niemann Pick Cl Like 1/NPC1L1 antibody ab121000

2 References

Overview

Product name Anti-Niemann Pick C1 Like 1/NPC1L1 antibody

Description Goat polyclonal to Niemann Pick C1 Like 1/NPC1L1

① This product is a **fast track antibody**. It has been affinity purified and shows high titre

values against the immunizing peptide by ELISA.

General notes

The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.

If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below along with publications, support regions and OSAs.

Properties

Form Liquid

Storage instructions Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid repeated freeze / thaw cycles.

Storage buffer pH: 7.30

Preservative: 0.02% Sodium azide

Constituents: 99% Tris buffered saline, 0.5% BSA

1

Purity Immunogen affinity purified

Purification notes Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity

chromatography using the immunizing peptide.

Clonality Polyclonal

Isotype IgG

Applications

Fast track antibodies constitute a diverse group of products that have been released to accelerate your research, but are not yet fully characterized. They have all been affinity purified and show high titre values against the immunizing peptide (by ELISA).

Fast track terms of use

Application	Abreviews	Notes
WB		Use a concentration of 1 µg/ml. Predicted molecular weight: 147 kDa. A 1 hour primary incubation is recommended for this product. Preliminary experiments in Mouse and Rat Liver lysates gave no specific signal but low background (at antibody concentration up to 1µg/ml). We would welcome your feedback if you have tested this antibody in more suitable positive controls.

Target

Function	Play a major role in cholesterol homeostasis. Is critical for the uptake of cholesterol across the plasma membrane of the intestinal enterocyte. Is the direct molecular target of ezetimibe, a drug that inhibits cholesterol absorbtion. Lack of activity leads to multiple lipid transport defects. The protein may have a function in the transport of multiple lipids and their homeostasis, and may play a critical role in regulating lipid metabolism.	
Tissue specificity	Widely expressed. Expressed in liver. Also expressed in small intestine, pancreas, kidney, lung, pancreas, spleen, heart, gall bladder, brain, testis, stomach and muscle.	
Sequence similarities	Belongs to the patched family. Contains 1 SSD (sterol-sensing) domain.	
Post-translational modifications	Highly glycosylated.	
Cellular localization	Apical cell membrane. Cell membrane. Cytoplasmic vesicle membrane. Subfractionation of brush border membranes from proximal enterocytes suggests considerable association with the apical membrane fraction. Exists as a predominantly cell surface membrane expressed protein (By	

similarity). According to PubMed:15671032, localizes in a subcellular vesicular compartment rich
