

Anti-Phosphotyrosine antibody ab9319

★★★★★ [2 Abreviews](#) [10 References](#) [2 Images](#)

Overview

Product name	Anti-Phosphotyrosine antibody
Description	Rabbit polyclonal to Phosphotyrosine
Host species	Rabbit
Specificity	Recognize proteins and peptides phosphorylated on tyrosine residues. No cross-reaction with phosphoserine and threonine.
Tested applications	Suitable for: ELISA, IP, WB, IHC-P, IHC-Fr
Species reactivity	Reacts with: Species independent
Immunogen	Chemical/ Small Molecule corresponding to Phosphotyrosine conjugated to keyhole limpet haemocyanin. Phospho-tyrosine KLH conjugates
Positive control	Use Vanadium treated cell culture (30 min) for Western Blotting and Tyrosine-phosphorylated peptide for ELISA. Human breast cancer tissue
General notes	<p>The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.</p> <p>If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As</p>

Properties

Form	Liquid
Storage instructions	Shipped at 4°C. Store at +4°C short term (1-2 weeks). Upon delivery aliquot. Store at -20°C. Avoid freeze / thaw cycle.
Storage buffer	pH: 6.00 Preservative: 0.01% Sodium azide Constituent: 0.114% Tris buffered saline
Purity	Immunogen affinity purified
Purification notes	Affinity purified with phospho-tyrosine on agarose and competitively eluted with N-acetylated phospho-tyrosine.
Clonality	Polyclonal

Isotype

IgG

Applications

The Abpromise guarantee

Our **Abpromise guarantee** covers the use of ab9319 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

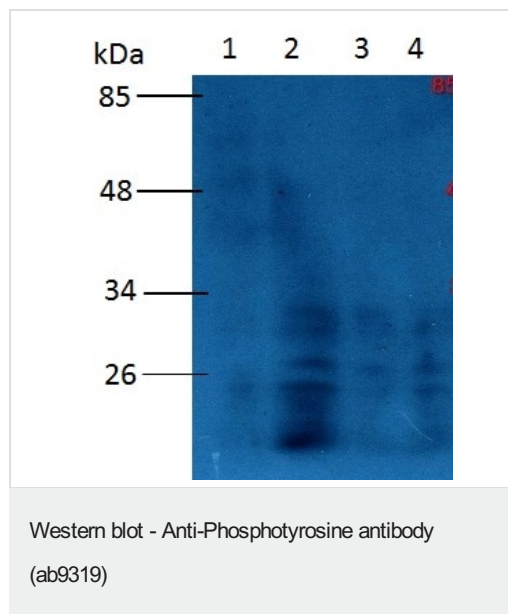

Application	Abreviews	Notes
ELISA		1/1000.
IP		Use at an assay dependent concentration. 10 µg/500 µg protein sample.
WB	★★★★★ (2)	1/250.
IHC-P		1/50.
IHC-Fr		1/50.

Target

Relevance

The phosphorylation of specific tyrosine residues has been shown to be a primary mechanism of signal transduction during normal mitogenesis, cell cycle progression and oncogenic transformation, its role in other areas such as differentiation and gap junction communication, is a matter of active and ongoing research. Antibodies that specifically recognize phosphorylated tyrosine residues have proved to be invaluable to the study of tyrosine phosphorylated proteins and the biochemical pathways in which they function.

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <https://www.abcam.com/abpromise> or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
