WB		1/500 - 1/1000. Predicted molecular weight: 74 kDa.

## Target

### Function

Required for efficient transcription initiation by RNA polymerase I. Required for the formation of the competent preinitiation complex (PIC). Dissociates from pol I as a consequence of transcription. In vitro, cannot activate transcription in a subsequent transcription reaction.

### Sequence similarities

Belongs to the RRN3 family.

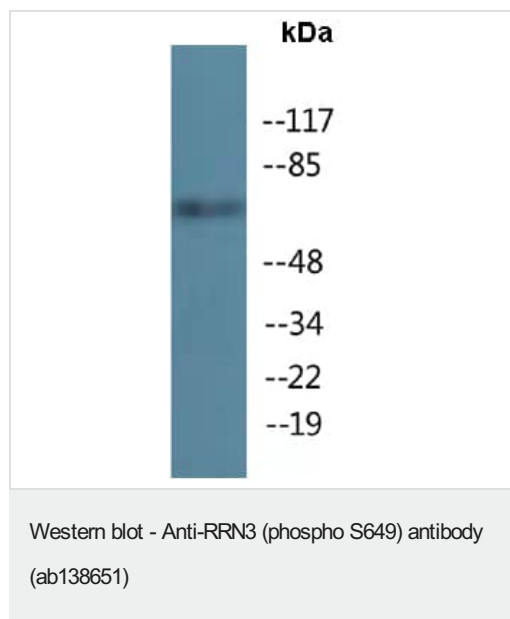

### Post-translational modifications

Phosphorylation is required for participation in rDNA transcription.

### Cellular localization

Nucleus > nucleolus.
