Applications

The Abpromise guarantee

Our **Abpromise guarantee** covers the use of ab96738 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes

IHC-P		1/100 - 1/500.

Target

Function	Involved in the
i dilodoli	

Involved in the endosomal multivesicular bodies (MVB) pathway. MVBs contain intraluminal vesicles (ILVs) that are generated by invagination and scission from the limiting membrane of the endosome and mostly are delivered to lysosomes enabling degradation of membrane proteins, such as stimulated growth factor receptors, lysosomal enzymes and lipids. Thought to be a cofactor of VPS4A/B, which catalyzes disassembles membrane-associated ESCRT-III assemblies. Involved in the sorting and down-regulation of EGFR (By similarity). Involved in HIV-1 budding.

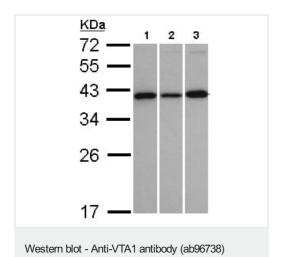

Sequence similarities

Belongs to the VTA1 family.

Cellular localization

Cytoplasm. Endosome membrane.
