

Cardiac Development and Regeneration
October 10-11, 2008
www.abcam.com/BostonCardio

Poster List

Poster 1 – Testosterone-induced cardiomyogenesis is dependent on Ca²⁺ influx and the activation of CamK II presented by Ashraf Al-Madhoun

Poster 2 – Marrow cell infusion attenuates vascular remodeling in a murine model of monocrotaline-induced pulmonary hypertension presented by Jason M. Aliotta

Poster 3 – Abstract title unavailable at time of printing by Sophie Astrof

Poster 4 – TGFbeta2 regulates epithelial-mesenchymal transition and heart valve remodeling presented by Mohamad Azhar

Poster 5 – Ischemia-induced activation and oxidation of aldose reductase is modulated by GSTP-dependent glutathiolation presented by Shahid Baba

Poster 6 – The characterization of the adhering junctions of valvular interstitial cells presented by Mareike Barth

Poster 7 – Functional analysis of novel genes involved in the differentiation of heart/hemangioblast precursor cells (H/HPC) presented by José A. Belo

Poster 8 – The regulation of Iroquois homeobox 4 during cardiomyocyte differentiation presented by S. Benton

Poster 9 – Perinatal heart development: Identification and characterization of a transitional program that control cell cycle arrest and terminal differentiation of the heart presented by Patrick G. Burgon

Poster 10 – Nodal/Cripto/Alk4 regulates novel paracrine heart-inducing factors presented by Wenqing Cai

Poster 11 – Co-expression of endothelin-converting enzyme-1 (ECE-1) and c-kit identify a novel population of putative cardiac stem cells in fetal sheep and human heart presented by Evan J. Colletti

Poster 12 – Lineage commitment and differentiation during murine cardiac development presented by Ibrahim Domian

Poster 13 – CK2 is required for canonical Wnt signaling and right heart development presented by Isabel Dominguez

Poster 14 – UNC-45b function is essential for early steps in mouse cardiac development presented by Henry F. Epstein

Poster 15 – Hes1 is expressed in the second heart field and is required for outflow tract development presented by Francesca Rochais

Poster 16 – Characterization of putative stem cells in the mammalian adult heart using a GFPTERT mouse presented by Grace Horrocks

Poster 17 – Activities of ligands for mouse RXR and Drosophila RXR(USP) to regulate stem cell differentiation presented by Grace Jones

Poster 18 – Zebrafish cardiac enhancer trap lines: New tools for cardiovascular research presented by Kar-Lai Poon

Poster 19 – Extracellular factors induce mononucleated cardiomyocytes to reenter the cell cycle and to divide presented by Bernhard Kühn

Poster 20 – Hemodynamic mechanisms of Endocardial Fibroelastosis (EFE) in the developing rat heart presented by I. Melnychenko

Poster 21 – Calreticulin is essential for cardiac differentiation of embryonic stem cells presented by Marek Michalak

Poster 22 – MicroRNA 21 plays a critical role in cardiac valvulogenesis presented by David J. Milan, MD

Poster 23 – The roles of miR-143 in cardiac chamber formation presented by Kota Miyasaka

Poster 24 – A heartbeat-dependent epigenetic control via Tbx5 and MRTFs regulates morphogenesis of the heart presented by Toshihiko Ogura

Poster 25 – Bioengineering conduction tissue for repair of pediatric heart block presented by Christina A. Pacak

Poster 26 – A burst of chondroitin sulfate expression is required for cardiac valvulogenesis presented by David S. Peal, PhD

Poster 27 – Nkx2.5 is regulated by protein phosphatase 1 presented by Tammy Porter

Poster 28 – MicroRNAs: important intermediaries in the flow of information from the genome to the proteome presented by Prakash K. Rao

Poster 29 – Computational imaging of heart morphogenesis in vivo presented by Brenda J. Rongish

Poster 30 – Small GTPase activation by obscurin promotes advanced differentiation of cardiac myocytes and neuroblasts presented by Mark W. Russell

Poster 31 – Ets-1 is required for the commitment of sub-epicardial mesenchyme to the hemangioblast lineage presented by Eric C. Svensson

Poster 32 – Nkx genes regulate heart tube extension and exert differential effects on ventricular and atrial cell number presented by Targoff, K.L.

Poster 33 – Wnt2 signaling regulates morphogenesis of the inflow tract and atrioventricular canal during cardiac development presented by Ying Tian

Poster 34 – Elucidating the role of BMP4 in secondary heart field development presented by Libbat Tirosch-Finkel

Poster 35 – A comparison of cardiac stem cell populations derived by two different isolation techniques from right atrial myocardium of young patients presented by Kalpana Vijayan PhD

Poster 36 – PKC inhibition ameliorates the cardiac phenotype of a mouse model for myotonic dystrophy, type I presented by Guey-Shin Wang

Poster 37 – Histone deacetylase 1 (HDAC1) is essential for cardiac development in zebrafish presented by Kerri S Warren

Poster 38 – Functional study of small heat shock protein hspB7 in heart development presented by Yu-Ting Yan

Poster 39 – How low can you go: Role of Pax3 in heart formation? presented by Chen-Ming Fan
