Overview

Product name: Anti-Angiotensin Converting Enzyme 1 antibody
Description: Rabbit polyclonal to Angiotensin Converting Enzyme 1
Host species: Rabbit
Tested applications: Suitable for: IHC-P, WB
Species reactivity: Reacts with: Mouse, Rat
Predicted to work with: Cat, Human

Immunogen: Synthetic peptide within Cat Angiotensin Converting Enzyme 1 aa 690-740 conjugated to keyhole limpet haemocyanin. The exact sequence is proprietary.
Database link: 101094061

Positive control: IHC-P: Rat pancreas tissue. WB: Mouse lung, liver and adrenal lysate.

Properties

Form: Liquid
Storage buffer: Preservative: 0.09% Sodium azide
Constituents: 50% Glycerol, 1% BSA
Purity: Protein A purified
Clonality: Polyclonal
Isotype: IgG

Applications

Our Abpromise guarantee covers the use of ab216476 in the following tested applications.
The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

**Target**

**Function**
Converts angiotensin I to angiotensin II by release of the terminal His-Leu, this results in an increase of the vasoconstrictor activity of angiotensin. Also able to inactivate bradykinin, a potent vasodilator. Has also a glycosidase activity which releases GPI-anchored proteins from the membrane by cleaving the mannose linkage in the GPI moiety.

**Tissue specificity**
Ubiquitously expressed, with highest levels in lung, kidney, heart, gastrointestinal system and prostate. Isoform Testis-specific is expressed in spermatocytes and adult testis.

**Involvement in disease**
- **Ischemic stroke (ISCHSTR) [MIM:601367]**: A stroke is an acute neurologic event leading to death of neural tissue of the brain and resulting in loss of motor, sensory and/or cognitive function. Ischemic strokes, resulting from vascular occlusion, is considered to be a highly complex disease consisting of a group of heterogeneous disorders with multiple genetic and environmental risk factors. Note=Disease susceptibility is associated with variations affecting the gene represented in this entry.
- **Renal tubular dysgenesis (RTD) [MIM:267430]**: Autosomal recessive severe disorder of renal tubular development characterized by persistent fetal anuria and perinatal death, probably due to pulmonary hypoplasia from early-onset oligohydramnios (the Potter phenotype). Note=The disease is caused by mutations affecting the gene represented in this entry.
- **Microvascular complications of diabetes 3 (MVCD3) [MIM:612624]**: Pathological conditions that develop in numerous tissues and organs as a consequence of diabetes mellitus. They include diabetic retinopathy, diabetic nephropathy leading to end-stage renal disease, and diabetic neuropathy. Diabetic retinopathy remains the major cause of new-onset blindness among diabetic adults. It is characterized by vascular permeability and increased tissue ischemia and angiogenesis. Note= Disease susceptibility is associated with variations affecting the gene represented in this entry.
- **Intracerebral hemorrhage (ICH) [MIM:614519]**: A pathological condition characterized by bleeding into one or both cerebral hemispheres including the basal ganglia and the cerebral cortex. It is often associated with hypertension and craniocerebral trauma. Intracerebral bleeding is a common cause of stroke. Note= Disease susceptibility is associated with variations affecting the gene represented in this entry.

**Sequence similarities**
Belongs to the peptidase M2 family.

**Post-translational modifications**
Phosphorylated by CK2 on Ser-1299; which allows membrane retention.

**Cellular localization**
Secreted and Cell membrane.

**Images**
Immunohistochemical analysis of formalin-fixed paraffin-embedded rat pancreas tissue sections labeling Angiotensin Converting Enzyme 1 with ab216476 at a 1/200 dilution. DAB staining.

**Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-Angiotensin Converting Enzyme 1 antibody (ab216476)**

**Western blot - Anti-Angiotensin Converting Enzyme 1 antibody (ab216476)**

**All lanes** : Anti-Angiotensin Converting Enzyme 1 antibody (ab216476) at 1/300 dilution

- **Lane 1** : Mouse lung lysates
- **Lane 2** : Mouse liver lysates
- **Lane 3** : Mouse adrenal lysates

**Secondary**

**All lanes** : Goat anti-rabbit IgG (H+L), HRP conjugated at 1/5000 dilution

**Predicted band size**: 150 kDa

**Please note**: All products are "FOR RESEARCH USE ONLY AND ARE NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE"

**Our Abpromise to you: Quality guaranteed and expert technical support**

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit [https://www.abcam.com/abpromise](https://www.abcam.com/abpromise) or contact our technical team.
Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
