Applications

Our [Abpromise guarantee](#) covers the use of **ab114101** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
IP		Use at 5-10 µg/mg of lysate.
Application notes	Is unsuitable for WB.	
Target		
Function	Component of the Mediator complex, a coactivator involved in the regulated transcription of nearly all RNA polymerase II-dependent genes. Mediator functions as a bridge to convey information from gene-specific regulatory proteins to the basal RNA polymerase II transcription machinery. Mediator is recruited to promoters by direct interactions with regulatory proteins and serves as a scaffold for the assembly of a functional preinitiation complex with RNA polymerase II and the general transcription factors.	
Sequence similarities	Belongs to the Mediator complex subunit 26 family. Contains 1 TFIIIS N-terminal domain.	
Cellular localization	Nucleus.
