The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
WB	★★★★★	
ICC/IF		

Application notes

ICC/IF: Use at a concentration of 10 µg/ml.
 WB: Use at a concentration of 1 - 5 µg/ml.

This antibody has only been tested in WB against the recombinant fragment used as immunogen. We have no data on the detection of endogenous protein.

Not yet tested in other applications.
 Optimal dilutions/concentrations should be determined by the end user.

Target

Function May play a role in growth regulation and in negative regulation of cell cycle progression.

Tissue specificity High levels in cerebellum, thymus, spleen and prostate. Low levels in skeletal muscle.

Sequence similarities Belongs to the cyclin family. Cyclin G subfamily.

Developmental stage Expression levels increase through the cell cycle to peak in the mid/late-S phase and decrease during G2/M phase.

Cellular localization Cytoplasm.
