Product datasheet

Anti-Cytokeratin 19 antibody [EP1580Y] ab52625

Overview

Product name: Anti-Cytokeratin 19 antibody [EP1580Y]
Description: Rabbit monoclonal [EP1580Y] to Cytokeratin 19
Host species: Rabbit
Tested applications: Suitable for: ICC/IF, IHC-Fr, WB, Flow Cyt, IHC-P
Unsuitable for: IP
Species reactivity: Reacts with: Mouse, Human
Immunogen: Synthetic peptide within Human Cytokeratin 19 (C terminal). The exact sequence is proprietary.
Database link: P08727
General notes: A trial size is available to purchase for this antibody.

Our RabMAb® technology is a patented hybridoma-based technology for making rabbit monoclonal antibodies. For details on our patents, please refer to RabMAb® patents

We are constantly working hard to ensure we provide our customers with best in class antibodies. As a result of this work we are pleased to now offer this antibody in purified format. We are in the process of updating our datasheets. The purified format is designated 'PUR' on our product labels. If you have any questions regarding this update, please contact our Scientific Support team.

This product is a recombinant rabbit monoclonal antibody.

Properties

Form: Liquid
Storage instructions: Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles.
Dissociation constant (K_D): K_D = 3.70 x 10^-10 M

Storage buffer
- pH: 7.20
- Preservative: 0.01% Sodium azide
- Constituents: PBS, 40% Glycerol, 0.05% BSA

Purity
- Protein A purified

Clonality
- Monoclonal

Clone number
- EP1580Y

Isotype
- IgG

Applications

Our Abpromise guarantee covers the use of ab52625 in the following tested applications. The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application notes
- Is unsuitable for IP.

Target

Function
- Involved in the organization of myofibers. Together with KRT8, helps to link the contractile apparatus to dystrophin at the costameres of striated muscle.

Tissue specificity
- Expressed in a defined zone of basal keratinocytes in the deep outer root sheath of hair follicles. Also observed in sweat gland and mammary gland ductal and secretory cells, bile ducts, gastrointestinal tract, bladder urothelium, oral epithelia, esophagus, ectocervical epithelium (at protein level). Expressed in epidermal basal cells, in nipple epidermis and a defined region of the hair follicle. Also seen in a subset of vascular wall cells in both the veins and artery of human umbilical cord, and in umbilical cord vascular smooth muscle. Observed in muscle fibers accumulating in the costameres of myoplasm at the sarcolemma in structures that contain dystrophin and spectrin.

Sequence similarities
- Belongs to the intermediate filament family.
**Developmental stage**: Present in hair follicles at all stages of development.

**Domain**: This keratin differs from all other IF proteins in lacking the C-terminal tail domain.

**Images**

Immunocytochemistry/Immunofluorescence analysis of HepG2 (human hepatocellular carcinoma) cells labelling Cytokeratin 19 (green) with purified ab52625 at 1/500. Cells were fixed with 4% Paraformaldehyde and permeabilized with 0.1% Triton X-100. 

*ab150077*, Alexa Fluor® 488-conjugated goat anti-rabbit IgG (1/1000) was used as the secondary antibody. Cells were counterstained with *ab7291*, anti-Tubulin (mouse mAb) at 1/1000 followed by *ab150120* AlexaFluor® 594 goat anti-mouse secondary (1/1000). Nuclei were counterstained with DAPI (blue).

For negative control 1, rabbit primary antibody and anti-mouse secondary antibody (*ab150120*) were used. For negative control 2, *ab7291* (mouse primary antibody) was used followed by anti-rabbit secondary antibody (*ab150077*).
**Western blot - Anti-Cytokeratin 19 antibody [EP1580Y] (ab52625)**

**All lanes**: Anti-Cytokeratin 19 antibody [EP1580Y] (ab52625) at 1/45000 dilution (purified)

**Lane 1**: HepG2 cell lysate  
**Lane 2**: NIH/3T3 cell lysate

Lysates/proteins at 20 µg per lane.

**Secondary**  
**All lanes**: HRP goat anti-rabbit (H+L) at 1/1000 dilution

**Predicted band size**: 44 kDa  
**Observed band size**: 40 kDa

Blocking buffer: 5% NFDM/TBST  
Dilution buffer: 5% NFDM/TBST

**Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-Cytokeratin 19 antibody [EP1580Y] (ab52625)**

Immunohistochemical staining of paraffin-embedded human skin with purified ab52625 at a dilution of 1/400. A pre-diluted HRP polymer for rabbit/mouse IgG was used as the secondary antibody and the sample was counter-stained with hematoxylin. Antigen retrieval was performed using Tris-EDTA buffer, pH 9.0. PBS was used instead of the primary antibody as the negative control, and is shown in the inset.
Flow Cytometry - Anti-Cytokeratin 19 antibody [EP1580Y] (ab52625)

ab52625 staining Cytokeratin 19 in the human cell line MCF-7 (human breast carcinoma) by flow cytometry. Cells were fixed with 4% paraformaldehyde, permeabilized with 90% methanol and the sample was incubated with the primary antibody at a dilution of 1/80. A goat anti rabbit IgG (Alexa Fluor® 488) at a dilution of 1/2000 was used as the secondary antibody.

Isotype control: Rabbit monoclonal IgG (Black)

Unlabelled control: Cell without incubation with primary antibody and secondary antibody (Blue)

Immunofluorescence staining of MCF-7 cells (fixed in 4% PFA, permeabilized with 0.1% Triton X 100) using purified ab52625 at a dilution of 1/200. An Alexa Fluor® 488 goat anti-rabbit antibody was used as the secondary at a dilution of 1/200 and the cells were counter stained with DAPI.

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-Cytokeratin 19 antibody [EP1580Y] (ab52625)

Unpurified ab52625 showing positive staining in Breast carcinoma tissue.
Overlay histogram showing HeLa cells stained with unpurified ab52625 (red line). The cells were fixed with 80% methanol (5 min) and then permeabilized with 0.1% PBS-Tween for 20 min. The cells were then incubated in 1x PBS / 10% normal goat serum / 0.3M glycine to block non-specific protein-protein interactions followed by the antibody (ab52625, 1/100 dilution) for 30 min at 22°C. The secondary antibody used was DyLight® 488 goat anti-rabbit IgG (H+L) (ab96899) at 1/500 dilution for 30 min at 22°C. Isotype control antibody (black line) was rabbit IgG (monoclonal) (1µg/1x10⁶ cells) used under the same conditions. Acquisition of >5,000 events was performed. This antibody gave a positive signal in HeLa cells fixed with 4% paraformaldehyde (10 min)/permeabilized with 0.1% PBS-Tween for 20 min used under the same conditions.

Unpurified ab52625 showing positive staining in Endometrial carcinoma tissue.
Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-Cytokeratin 19 antibody [EP1580Y] (ab52625)

Unpurified ab52625 showing negative staining in Glioma tissue.

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-Cytokeratin 19 antibody [EP1580Y] (ab52625)

Unpurified ab52625 showing positive staining in Gastric adenocarcinoma tissue.

Immunohistochemistry (Frozen sections) - Anti-Cytokeratin 19 antibody [EP1580Y] (ab52625)

This image is courtesy of an Abreview submitted by Isabelle Miletich (2102002)

ab52625 staining Cytokeratin 19 in Mouse salivary gland by Immunohistochemistry (IHC-Fr - frozen sections). Tissue was fixed with formaldehyde, permeabilized with 0.1% Triton and blocked with 2000µg BSA for 1 hour at 21°C. Samples were incubated with primary antibody (PBS + 0.05% Triton + 0.1% BSA) for 24 hours at 4°C. A Alexa Flour® 488 -conjugated goat anti-rabbit polyclonal (1/200) was used as the secondary antibody.

Please note: All products are "FOR RESEARCH USE ONLY AND ARE NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
