Applications

Our Abpromise guarantee covers the use of ab228462 in the following tested applications.
Function
Involved in the costimulatory signal, essential for T-cell proliferation and production of IL10 and IFNG, in an IL2-dependent and a PDCD1-independent manner. Interaction with PDCD1 inhibits T-cell proliferation and cytokine production.

Tissue specificity
Highly expressed in the heart, skeletal muscle, placenta and lung. Weakly expressed in the thymus, spleen, kidney and liver. Expressed on activated T- and B-cells, dendritic cells, keratinocytes and monocytes.

Sequence similarities
Belongs to the immunoglobulin superfamily. BTN/MOG family. 
Contains 1 Ig-like C2-type (immunoglobulin-like) domain. 
Contains 1 Ig-like V-type (immunoglobulin-like) domain.

Cellular localization
Cell membrane and Endomembrane system.
