Applications

Our [Abpromise guarantee](#) covers the use of **ab117919** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
WB		1/200 - 1/500. Predicted molecular weight: 33 kDa.

Target

Function	F-actin-capping proteins bind in a Ca(2+)-independent manner to the fast growing ends of actin filaments (barbed end) thereby blocking the exchange of subunits at these ends. Unlike other capping proteins (such as gelsolin and severin), these proteins do not sever actin filaments.
Sequence similarities	Belongs to the F-actin-capping protein alpha subunit family.
Cellular localization	Cytoplasm > cytoskeleton.
