Applications

Our [Abpromise guarantee](#) covers the use of **ab123370** in the following tested applications.

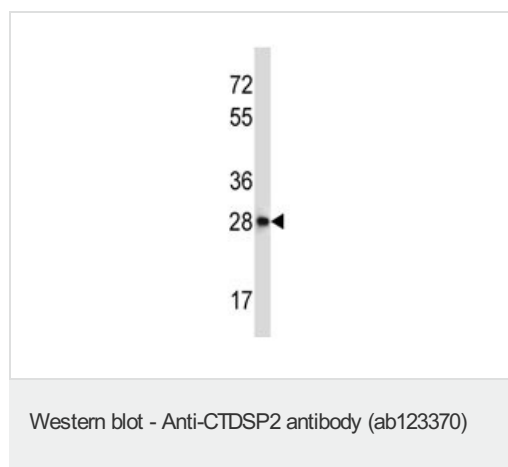

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
WB		1/100 - 1/500. Predicted molecular weight: 31 kDa.

Target

Function	Preferentially catalyzes the dephosphorylation of 'Ser-5' within the tandem 7 residues repeats in the C-terminal domain (CTD) of the largest RNA polymerase II subunit POLR2A. Negatively regulates RNA polymerase II transcription, possibly by controlling the transition from initiation/capping to processive transcript elongation. Recruited by REST to neuronal genes that contain RE-1 elements, leading to neuronal gene silencing in non-neuronal cells. May contribute to the development of sarcomas.
Tissue specificity	Expression is restricted to non-neuronal tissues. Highest expression in pancreas and lowest in liver.
Sequence similarities	Contains 1 FCP1 homology domain.
Cellular localization	Nucleus.
