Applications

Our [Abpromise guarantee](#) covers the use of **ab57789** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
WB		Use a concentration of 1 - 5 µg/ml. This antibody has only been tested in WB against the recombinant fragment used as immunogen. We have no data on the detection of endogenous protein.

Target

Function	Adapter molecule for TNFRSF1A/TNFR1 that specifically associates with the cytoplasmic domain of activated TNFRSF1A/TNFR1 mediating its interaction with FADD. Overexpression of TRADD leads to two major TNF-induced responses, apoptosis and activation of NF-kappa-B.
Tissue specificity	Found in all examined tissues.
Sequence similarities	Contains 1 death domain.
Domain	Requires the intact DEATH domain to associate with TNFRSF1A/TNFR1.
Cellular localization	Cytoplasm > cytoskeleton.
