Overview

Product name: Anti-Aflatoxin antibody [1C6]
Description: Rat monoclonal [1C6] to Aflatoxin
Host species: Rat
Specificity: This antibody reacts with Aflatoxin M1 (AFM1) and Aflatoxin B1 (AFB1). It does not react with BSA and other irrelevant antigens by ELISA. A competitive binding assay using AFM1 as the binding competitor to compete with AFM1-BSA\(^{125}\) showed that AFM1 can effectively inhibit the binding of this antibody to AFM1-BSA\(^{125}\) and the inhibition degree corresponds to the amounts of AFM1 used. The equilibrium constant \(K\) of antibody affinity of this product is \(10^{9}-10^{11}\) M\(^{-1}\).

Tested applications: Suitable for: ELISA
