Product name: Anti-Avian Influenza A Hemagglutinin antibody

Description: Rabbit polyclonal to Avian Influenza A Hemagglutinin

Host species: Rabbit

Specificity: Rabbit anti-Hemagglutinin (NT) protein polyclonal antibody was raised against a synthetic peptide corresponding to 15 amino acids at the amino terminus of the Hemagglutinin protein (Genbank accession no. AAT76166). Efforts were made to use relatively conserved regions of the viral sequence as the antigen. The antibody only recognizes the cleaved subunit not the full-length H5.

Tested applications: Suitable for: WB, ELISA

Species reactivity: Reacts with: Other species

Immunogen: Synthetic peptide corresponding to 15 amino acids near the N terminus of the Hemagglutinin protein. (Peptide available as ab39772).

Properties

Form: Liquid

Storage instructions: Shipped at 4°C. Store at +4°C.

Storage buffer: Preservative: 0.02% Sodium azide
                  Constituent: PBS

Purity: Immunogen affinity purified

Clonality: Polyclonal

Isotype: IgG

Applications

Our Abpromise guarantee covers the use of ab21297 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.
Influenza A virus is a major public health threat, killing more than 30,000 people per year in the USA. Novel influenza virus strains caused by genetic drift and viral recombination emerge periodically to which humans have little or no immunity, resulting in devastating pandemics. Influenza A can exist in a variety of animals; however it is in birds that all subtypes can be found. These subtypes are classified based on the combination of the virus coat glycoproteins hemagglutinin (HA) and neuraminidase (NA) subtypes. HA interacts with cell surface proteins containing oligosaccharides with terminal sialyl residues. Virus isolated from a human infected with the H5N1 strain in 1997 could bind to oligosaccharides from human as well as avian sources, indicating its species-jumping ability.
Western blot analysis of 5 ng (A) or 25 ng (B) of recombinant Hemagglutinin (HA1) using H5N1 Hemagglutinin antibody (ab21297 at 1 µg/ml.)

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
