Overview

Product name Cytokine Array – Human Cytokine Antibody Array (Membrane, 42 Targets)
Sample type Cell culture supernatant, Saliva, Milk, Urine, Serum, Plasma, Cell culture extracts, Other biological fluids, Whole Blood, Tissue Extracts, Cell Lysate, Cell culture media
Assay type Semi-quantitative
Species reactivity Reacts with: Human
Product overview ab133997 is a cytokine array to be used for the simultaneous detection of 42 Human cytokines. It is suitable for all sample types.

Targets: ENA-78, GCSF, GM-CSF, GRO, GRO-alpha, l-309, IL-1alpha, IL-1beta, IL-2, IL-3, IL-4, IL-5, IL-6, IL-7, IL-8, IL-10, IL-12 p40/p70, IL-13, IL-15, IFN-gamma, MCP-1, MCP-2, MCP-3, MCSF, MDC, MIG, MIP-1delta, RANTES, SCF, SDF-1, TARC, TGF-beta1, TNF-alpha, TNF-beta, EGF, IGF-I, Angiogenin, Oncostatin M, Thrombopoietin, VEGF-A, PDGF BB, Leptin

Cytokine arrays are an antibody-pair-based assay, analogous to ELISA, but using a membrane as a substrate rather than a plate. Capture antibodies are supplied arrayed/spotted on a membrane with each pair of spots representing a different analyte. Sample is added (0.2-1ml of 1 sample to each membrane), and then paired biotinylated detector antibodies and streptavidin HRP. The cytokine array is analyzed using the same methods as a chemiluminescent western blot. Comparison between samples can be by eye or using densitometry software for a semi-quantitative comparison.

Notes

If you are interested in this cytokine array, cytokine array ab133998, ab133996, ab169817, ab134003, ab134000, ab169804 and ab169805 may also be of interest.

A table listing all of our human membrane antibody cytokine arrays and other arrays and the analytes they measure is available here.

Abcam has not and does not intend to apply for the REACH Authorisation of customers’ uses of products that contain European Authorisation list (Annex XIV) substances.
It is the responsibility of our customers to check the necessity of application of REACH Authorisation, and any other relevant authorisations, for their intended uses.

**Tested applications**

**Suitable for:** Multiplex Protein Detection

**Properties**

**Storage instructions**

Store at -20°C. Please refer to protocols.

**Applications**

**The Abpromise guarantee**

Our Abpromise guarantee covers the use of ab133997 in the following tested applications. The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Human peripheral blood cells ($1 \times 10^6$ cells/mL) were cultured in RPMI media supplemented with 10% fetal calf serum, 100 U/mL penicillin, and 100 mg/mL streptomycin sulfate.

Cells were cultured unstimulated or stimulated with 10 µg/mL PHA. Conditioned media was harvested after 48 hours, aliquoted and assayed using ab133997. Media alone was used as a negative control.

The antibody array was used to determine the change in expression of cytokines related to cell proliferation.

One million Human breast cancer cells (MCF7) were cultured in a 10mm dish for 48 hours (in 8ml of RPMI-1640 medium) and were then treated with 5 mM Compound X (not disclosed) for 48 hours. The Abcam protocol was followed for the rest of the procedure. 1 mL of supernatant of culture medium was used for sample incubation (4°C overnight).

Rating: 4.5/5

Cells were cultured unstimulated or stimulated with 10 µg/mL PHA. Conditioned media was harvested after 48 hours, aliquoted and assayed using ab133997. Media alone was used as a negative control. Mean pixel density was quantified using CCD camera software analysis.
Human serum from a pooled donor (n=50) sample was diluted to 50% and assayed using ab133997.

Quantification of Human Cytokine Array (membrane antibody array)

Human serum from a pooled donor (n=50) sample was diluted to 50% and assayed using ab133997. Mean pixel density was quantified using CCD camera software analysis.

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
We investigate all quality concerns to ensure our products perform to the highest standards.

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
