Human Tissue Factor Pathway Inhibitor ELISA Kit (TFPI) ab108904

Overview

**Product name**: Human Tissue Factor Pathway Inhibitor ELISA Kit (TFPI)  
**Detection method**: Colorimetric  
**Sample type**: Cell culture supernatant, Milk, Serum, Plasma  
**Assay type**: Sandwich (quantitative)  
**Sensitivity**: > 0.12 ng/ml  
**Range**: 0.313 ng/ml - 20 ng/ml  
**Recovery**: 96.5 %  
**Assay time**: 5h 00m  
**Assay duration**: Multiple steps standard assay  
**Species reactivity**: Reacts with: Human  
**Product overview**: Abcam’s Tissue Factor Pathway Inhibitor (TFPI) Human *in vitro* ELISA (Enzyme-Linked Immunosorbent Assay) kit is designed for the quantitative measurement of Tissue Factor Pathway Inhibitor concentrations in plasma, serum, milk, cerebrospinal fluid and cell culture samples.

A Tissue Factor Pathway Inhibitor specific antibody has been precoated onto 96-well plates and blocked. Standards or test samples are added to the wells and subsequently a Tissue Factor Pathway Inhibitor specific biotinylated detection antibody is added and then followed by washing with wash buffer. Streptavidin-Peroxidase Conjugate is added and unbound conjugates are washed away with wash buffer. TMB is then used to visualize Streptavidin-Peroxidase enzymatic reaction. TMB is catalyzed by Streptavidin-Peroxidase to produce a blue color product that
changes into yellow after adding acidic stop solution. The density of yellow coloration is directly proportional to the amount of Tissue Factor Pathway Inhibitor captured in plate.

Get results in 90 minutes with Human Tissue Factor Pathway Inhibitor ELISA Kit (ab188392) from our SimpleStep ELISA® range.

The entire kit may be stored at -20°C for long term storage before reconstitution - Avoid repeated freeze-thaw cycles.

Tested applications

Suitable for: Sandwich ELISA

Platform

Microplate

Properties

Storage instructions

Store at -20°C. Please refer to protocols.

Function

Inhibits factor X (X(a)) directly and, in a Xa-dependent way, inhibits VIIa/tissue factor activity, presumably by forming a quaternary Xa/LACI/VIIa/TF complex. It possesses an antithrombotic action and also the ability to associate with lipoproteins in plasma.

Tissue specificity

Mostly in endothelial cells.

Sequence similarities

Contains 3 BPTI/Kunitz inhibitor domains.

Domain

This inhibitor contains three inhibitory domains. The first domain interacts with VIIa and TF, the second one with Xa.

Post-translational modifications

O-glycosylated.

Cellular localization

Secreted and Microsome membrane.

Applications
Our Abpromise guarantee covers the use of ab108904 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES".

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
We investigate all quality concerns to ensure our products perform to the highest standards.

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors.
