Product datasheet

Anti-IRF3 antibody [EPR2418Y] ab68481

Overview

Product name: Anti-IRF3 antibody [EPR2418Y]
Description: Rabbit monoclonal [EPR2418Y] to IRF3
Host species: Rabbit
Tested applications: Suitable for: ICC/IF, WB, IHC-P, Flow Cyt
Unsuitable for: IP
Species reactivity: Reacts with: Mouse, Human
Immunogen: Synthetic peptide within Human IRF3 aa 50-150. The exact sequence is proprietary.
Database link: Q14653
(Peptide available as ab203561)
General notes: Rat: We have preliminary internal testing data to indicate this antibody may not react with these species. Please contact us for more information.
Our RabMab® technology is a patented hybridoma-based technology for making rabbit monoclonal antibodies. For details on our patents, please refer to RabMab® patents.
This product is a recombinant rabbit monoclonal antibody.

Properties

Form: Liquid
Storage buffer: pH: 7.40
Preservative: 0.01% Sodium azide
Constituents: 40% Glycerol, 0.05% BSA, 59% PBS
Purity: Protein A purified
Clonality: Monoclonal
Clone number: EPR2418Y
Isotype: IgG

Applications

Our Abpromise guarantee covers the use of ab68481 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application notes

Is unsuitable for IP.

Target

Function

Mediates interferon-stimulated response element (ISRE) promoter activation. Functions as a molecular switch for antiviral activity. DsRNA generated during the course of a viral infection leads to IRF3 phosphorylation on the C-terminal serine/threonine cluster. This induces a conformational change, leading to its dimerization, nuclear localization and association with CREB binding protein (CREBBP) to form dsRNA-activated factor 1 (DRAF1), a complex which activates the transcription of genes under the control of ISRE. The complex binds to the IE and PRDIII regions on the IFN-alpha and IFN-beta promoters respectively. IRF-3 does not have any transcription activation domains.

Tissue specificity

Expressed constitutively in a variety of tissues.

Sequence similarities

Belongs to the IRF family.
Contains 1 IRF tryptophan pentad repeat DNA-binding domain.

Post-translational modifications

Constitutively phosphorylated on many serines residues. C-terminal serine/threonine cluster is phosphorylated in response of induction by IKBKE and TBK1. Ser-385 and Ser-386 may be specifically phosphorylated in response to induction. An alternate model propose that the five serine/threonine residues between 396 and 405 are phosphorylated in response to a viral infection. Phosphorylation, and subsequent activation of IRF3 is inhibited by vaccinia virus protein E3.
Ubiquitinated; ubiquitination involves RBCK1 leading to proteasomal degradation.
Polyubiquitinated; ubiquitination involves TRIM21 leading to proteasomal degradation.
ISGylated by HERC5 resulting in sustained IRF3 activation and in the inhibition of IRF3 ubiquitination by disrupting PIN1 binding. The phosphorylation state of IRF3 does not alter ISGylation.
Cytoplasm. Nucleus. Shuttles between cytoplasmic and nuclear compartments, with export being the prevailing effect. When activated, IRF3 interaction with CREBBP prevents its export to the cytoplasm.

Overlay histogram showing HAP1 wildtype (green line) and HAP1-IRF3 knockout cells (red line) stained with ab68481. The cells were fixed with 80% methanol (5 min) (left pannel) or 4% formaldehyde (10 min) (right pannel), and then permeabilized with 0.1% PBS-Triton X-100 for 15 min. The cells were then incubated in 1x PBS / 10% normal goat serum to block non-specific protein-protein interactions followed by the antibody (ab68481, 0.1µg/ml) for 30 min at 22°C. The secondary antibody used was Alexa Fluor® 488 goat anti-rabbit IgG (H&L) presorbed (ab150081) at 1/2000 dilution for 30 min at 22°C.

A rabbit IgG isotype control antibody (ab172730) was used at the same concentration and conditions as the primary antibody (HAP1 wildtype - black line, HAP1-IRF3 knockout - grey line). Unlabelled sample was also used as a control (this line is not shown for the purpose of simplicity).

Acquisition of >5,000 events were collected using a 50 mW Blue laser (488nm) and 530/30 bandpass filter.

Note: We recommend fixing cells using MeOH instead of PFA to get optimal results.

Lane 1: Wild-type HAP1 cell lysate (20 µg)
Lane 2: IRF3 knockout HAP1 cell lysate (20 µg)
Lane 3: HeLa cell lysate (20 µg)
Lane 4: Jurkat cell lysate (20 µg)
Lanes 1 - 4: Merged signal (red and green). Green - ab68481 observed at 50 kDa. Red - loading control, ab8245, observed at 37 kDa.

ab68481 was shown to react with IRF3 in wild-type HAP1 cells along with additional cross-reactive bands. No band was observed when IRF3 knockout samples were examined. Wild-type and IRF3 knockout samples were subjected to SDS-PAGE. ab68481 and ab8245 (loading control to GAPDH) were both diluted to 1/1000 and 1/10,000 respectively and incubated overnight at 4°C. Blots were developed with Goat anti-Rabbit IgG H&L (IRDye® 800CW) preadsorbed (ab216773) and Goat anti-Mouse IgG H&L (IRDye® 800CW) preadsorbed (ab216777) both diluted 1/10,000 and 1/10,000 respectively.
680RD) preadsorbed (ab216776) secondary antibodies at 1/10,000 dilution for 1 hour at room temperature before imaging.

Immunofluorescent analysis of 4% paraformaldehyde-fixed, 0.1% Triton X-100 permeabilized HeLa (Human epithelial cells from cervix adenocarcinoma) cells labeling IRF3 with ab68481 at 1/100 dilution. Goat anti-rabbit IgG (Alexa Fluor® 488) (ab150077) at 1/400 dilution was used as the secondary antibody (green). The confocal image shows cytoplasmic on HeLa cells. The nuclear counter stain is DAPI (blue). Tubulin is detected with ab7291 (anti-Tubulin mouse mAb) at 1/500 and ab150120 (AlexaFluor®594 Goat anti-Mouse secondary) at 1/500 dilution (red).

The negative controls are as follows;
1. ab68481 at 1/100 dilution followed by ab150120 (AlexaFluor®594 Goat anti-Mouse secondary) at 1/500 dilution.
2. ab7291 (anti-Tubulin mouse mAb) at 1/500 dilution followed by ab150077 (Alexa Fluor®488 Goat Anti-Rabbit IgG H&L) at 1/400 dilution.

All lanes : Anti-IRF3 antibody [EPR2418Y] (ab68481) at 1/1000 dilution

Lane 1 : Human fetal heart lysate
Lane 2 : Human fetal kidney lysate

Lysates/proteins at 10 µg per lane.

Secondary

All lanes : Anti-Rabbit IgG (HRP), specific to the non-reduced form of IgG at 1/1000 dilution

Predicted band size: 47 kDa

Blocking and Dilution buffer: 5% NFDM/TBST
**Western blot - Anti-IRF3 antibody [EPR2418Y] (ab68481)**

**All lanes**: Anti-IRF3 antibody [EPR2418Y] (ab68481) at 1/10000 dilution

**Lane 1**: THP-1 (Human monocytic leukemia cells) whole cell lysates

**Lane 2**: HepG2 (Human liver hepatocellular carcinoma) whole cell lysates

**Lane 3**: Daudi (Human Burkitt's lymphoma cell line) whole cell lysates

Lysates/proteins at 10 µg per lane.

**Secondary**

**All lanes**: Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/1000 dilution

**Predicted band size**: 47 kDa

**Observed band size**: 51 kDa

*Why is the actual band size different from the predicted?*

Blocking and Dilution buffer: 5% NFDM/TBST

---

**Western blot - Anti-IRF3 antibody [EPR2418Y] (ab68481)**

**All lanes**: Anti-IRF3 antibody [EPR2418Y] (ab68481) at 1/10000 dilution

**Lane 1**: HeLa (Human epithelial cells from cervix adenocarcinoma) whole cell lysates

**Lane 2**: Jurkat (Human T cell leukemia cells from peripheral blood) whole cell lysates

Lysates/proteins at 20 µg per lane.

**Secondary**

**All lanes**: Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/1000 dilution

**Predicted band size**: 47 kDa
**Observed band size:** 51 kDa

Why is the actual band size different from the predicted?

Blocking and Dilution buffer: 5% NFDM/TBST

**All lanes:** Anti-IRF3 antibody [EPR2418Y] (ab68481) at 1/1000 dilution

**Lane 1:** Mouse heart lysate

**Lane 2:** Mouse spleen lysate

**Lane 3:** NIH/3T3 (Mouse embryo fibroblast cells) whole cell lysates

Lysates/proteins at 10 µg per lane.

**Secondary**

**All lanes:** Anti-Rabbit IgG (HRP), specific to the non-reduced form of IgG at 1/1000 dilution

**Predicted band size:** 47 kDa

**Observed band size:** 47 kDa

Blocking and Dilution buffer: 5% NFDM/TBST

The slightly smaller molecular mass observed in mouse than in human is supported by literature.

Flow cytometry analysis of 2% paraformaldehyde fixed U937 (Human histiocytic lymphoma cells) cells labeling IRF3 with ab68481 at 1/160 dilution (red line). Secondary antibody used is a goat anti rabbit IgG (FITC) at 1/150 dilution. The isotype control is rabbit monoclonal IgG (black line). The unlabeled control is cells without incubation with primary and secondary antibodies (blue line).
Immunohistochemical analysis of paraffin-embedded Human tonsil labeling IRF3 with ab68481 at 1/500 dilution, followed by prediluted HRP Polymer for Rabbit/Mouse IgG. The negative control utilised PBS instead of primary antibody. Counter stained with Hematoxylin.

Immunohistochemical analysis of paraffin-embedded Human squamous cell carcinoma of cervix labeling IRF3 with ab68481 at 1/500 dilution, followed by prediluted HRP Polymer for Rabbit/Mouse IgG. The negative control utilised PBS instead of primary antibody. Counter stained with Hematoxylin.

Immunohistochemical analysis of paraffin-embedded Mouse spleen labeling IRF3 with ab68481 at 1/500 dilution, followed by prediluted HRP Polymer for Rabbit/Mouse IgG. The negative control utilised PBS instead of primary antibody. Counter stained with Hematoxylin.

**Our Abpromise to you: Quality guaranteed and expert technical support**

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit [https://www.abcam.com/abpromise](https://www.abcam.com/abpromise) or contact our technical team.

**Terms and conditions**

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
