Overview

Product name: Anti-Muscarinic Acetylcholine Receptor 1/CHRM1 antibody

Description: Goat polyclonal to Muscarinic Acetylcholine Receptor 1/CHRM1

Host species: Goat

Tested applications: Suitable for: WB

Species reactivity: Reacts with: Human

Predicted to work with: Mouse, Rat, Dog, Pig, Rhesus monkey, Orangutan

Immunogen: Synthetic peptide corresponding to Human Muscarinic Acetylcholine Receptor 1/CHRM1 aa 438-453 (C terminal).

Sequence: C-DKRRWRKIPKRPGSVH

Database link: NP_000729.2

Positive control: Human brain lysate.

General notes: The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.

If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As

Properties

Form: Liquid

Storage instructions: Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid repeated freeze / thaw cycles.

Storage buffer: pH: 7.30
Preservative: 0.02% Sodium azide
Constituents: 0.5% BSA, Tris buffered saline

Purity: Immunogen affinity purified
Purification notes
ab77098 is purified from goat serum by ammonium sulphate precipitation, followed by antigen affinity chromatography using the immunizing peptide.

Clonality
Polyclonal

Isotype
IgG

Applications

The Abpromise guarantee
Our Abpromise guarantee covers the use of ab77098 in the following tested applications. The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Target

Relevance
The muscarinic cholinergic receptors belong to a larger family of G protein-coupled receptors. The functional diversity of these receptors is defined by the binding of acetylcholine and includes cellular responses such as adenylate cyclase inhibition, phosphoinositide degeneration, and potassium channel mediation. Muscarinic receptors influence many effects of acetylcholine in the central and peripheral nervous system. The muscarinic cholinergic receptor 1 is involved in mediation of vagally-induced bronchoconstriction and in the acid secretion of the gastrointestinal tract. Muscarinic receptors are so called as they are more sensitive to the effects of the alkaloid muscarine, rather than nicotine.

Cellular localization
Cell Membrane; multi-pass membrane protein

Images

Anti-Muscarinic Acetylcholine Receptor 1/CHRM1 antibody (ab77098) at 0.300000011920929 µg/ml + human brain lysate (in RIPA buffer) at 35 µg
Predicted band size: 51 kDa
Observed band size: 48 kDa

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"
Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
