## Applications

**The Abpromise guarantee** Our [Abpromise guarantee](#) covers the use of ab16148 in the following tested applications. The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
<b>Sandwich ELISA</b>		Use a concentration of 5 µg/ml. Can be paired for Sandwich ELISA with <a href="#">Rabbit polyclonal to MyoD1 (ab64159)</a> . For sandwich ELISA, use this antibody as Capture at 5 µg/ml with <a href="#">Rabbit polyclonal to MyoD1 (ab64159)</a> as Detection.
<b>IHC-P</b>	★★★★★ (6)	Use a concentration of 2 - 4 µg/ml.

## Target

<b>Function</b>	Involved in muscle differentiation (myogenic factor). Induces fibroblasts to differentiate into myoblasts. Activates muscle-specific promoters. Interacts with and is inhibited by the twist protein. This interaction probably involves the basic domains of both proteins.
<b>Sequence similarities</b>	Contains 1 basic helix-loop-helix (bHLH) domain.
<b>Post-translational modifications</b>	Acetylated by a complex containing EP300 and PCAF. The acetylation is essential to activate target genes. Conversely, its deacetylation by SIRT1 inhibits its function. Ubiquitinated on the N-terminus; which is required for proteasomal degradation.
<b>Cellular localization</b>	Nucleus.
