Product datasheet

Anti-PAI1 antibody [1D5] ab125687

6 References  6 Images

Overview

Product name  Anti-PAI1 antibody [1D5]
Description  Mouse monoclonal [1D5] to PAI1
Host species  Mouse
Tested applications  Suitable for: WB, ELISA, Flow Cyt, IHC-P
Species reactivity  Reacts with: Mouse, Human
Immunogen  Purified recombinant fragment of Human PAI1 expressed in E. Coli.
Positive control  Recombinant Human PAI1 protein (aa194-316); PAI1 (aa194-316)-hlgGFc transfected HEK293 cell lysate; Human lung cancer and kidney cancer tissues; NIH 3T3 cells.
General notes  This product was changed from ascites to supernatant. Lot no's high than GR201079-27 are from Tissue Culture Supernatant

Properties

Form  Liquid
Storage instructions  Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles.
Storage buffer  Preservative: 0.05% Sodium azide
Constituent: PBS
Purity  Protein G purified
Purification notes  Purified from tissue culture supernatant.
Clonality  Monoclonal
Clone number  1D5
Isotype  IgG1

Applications

Our Abpromise guarantee covers the use of ab125687 in the following tested applications.
The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.
Function
This inhibitor acts as 'bait' for tissue plasminogen activator, urokinase, and protein C. Its rapid interaction with TPA may function as a major control point in the regulation of fibrinolysis.

Tissue specificity
Found in plasma and platelets and in endothelial, hepatoma and fibrosarcoma cells.

Involvement in disease
Defects in SERPINE1 are the cause of plasminogen activator inhibitor-1 deficiency (PAI-1D) [MIM:613329]. It is a hematologic disorder characterized by increased bleeding after trauma, injury, or surgery. Affected females have menorrhagia. The bleeding defect is due to increased fibrinolysis of fibrin blood clots due to deficiency of plasminogen activator inhibitor-1, which inhibits tissue and urinary activators of plasminogen.

Note=High concentrations of SERPINE1 seem to contribute to the development of venous but not arterial occlusions.

Sequence similarities
Belongs to the serpin family.

Post-translational modifications
Inactivated by proteolytic attack of the urokinase-type (u-PA) and the tissue-type (TPA), cleaving the 369-Arg-Met-370 bond.

Cellular localization
Secreted.

**ELISA - Anti-PAI1 antibody [1D5] (ab125687)**

**ELISA using ab125687**.

**ab123687** at 1/200 dilution staining PAI1 in Paraffin-embedded Human lung cancer tissue by Immunohistochemistry followed by DAB staining.
Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-PAI1 antibody [1D5] (ab125687)

**ab123687** at 1/200 dilution staining PAI1 in Paraffin-embedded Human kidney cancer tissue by Immunohistochemistry followed by DAB staining.

Flow Cytometry - Anti-PAI1 antibody [1D5] (ab125687)

**ab125687** at 1/200 dilution staining PAI1 in NIH 3T3 cells by Flow Cytometry (green), negative control (red).

Please note: All products are "FOR RESEARCH USE ONLY AND ARE NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE"

**Our Abpromise to you: Quality guaranteed and expert technical support**

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit [https://www.abcam.com/abpromise](https://www.abcam.com/abpromise) or contact our technical team.

**Terms and conditions**

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
