**Product datasheet**

**Anti-pan Cytokeratin antibody [PCK-26] ab6401**

★★★★ 18 Abreviews  23 References  6 Images

### Overview

**Product name**  Anti-pan Cytokeratin antibody [PCK-26]

**Description**  Mouse monoclonal [PCK-26] to pan Cytokeratin

**Host species**  Mouse

**Tested applications**  Suitable for: WB, IHC-FoFr, IHC-P, IHC-Fr, Dot blot, Flow Cyt, ICC/IF

**Species reactivity**  Reacts with: Mouse, Sheep, Human, Pig

**Immunogen**  Full length native protein (purified) corresponding to Human pan Cytokeratin.

**General notes**  We are constantly working hard to ensure we provide our customers with best in class antibodies. As a result of this work we are pleased to now offer this antibody in purified format. We are in the process of updating our datasheets. The purified format is designated 'PUR' on our product labels. If you have any questions regarding this update, please contact our Scientific Support team.

### Properties

**Form**  Liquid

**Storage instructions**  Shipped at 4°C. Store at +4°C short term (1-2 weeks). Upon delivery aliquot. Store at -20°C or -80°C. Avoid freeze / thaw cycle.

**Storage buffer**  pH: 7.4  Preservative: 0.097% Sodium azide  Constituent: PBS

**Purity**  Proprietary Purification

**Purification notes**  Purified from Ascites

**Clonality**  Monoclonal

**Clone number**  PCK-26

**Myeloma**  unknown

**Isotype**  IgG1

**Light chain type**  unknown

### Applications
Relevance

Cytokeratins, a group comprising at least 29 different proteins, are characteristic of epithelial and trichocytic cells. Cytokeratins 1, 4, 5, 6, and 8 are members of the type II neutral to basic subfamily. Monoclonal anti cytokeratins are specific markers of epithelial cell differentiation and have been widely used as tools in tumor identification and classification. Monoclonal Anti Pan Cytokeratin (mixture) is a broadly reactive reagent, which recognizes epitopes present in most human epithelial tissues. It facilitates typing of normal, metaplastic and neoplastic cells. Synergy between the various components results in staining amplification. This enables identification of cells, which would otherwise be stained only marginally. The mixture may aid in the discrimination of carcinomas and nonepithelial tumors such as sarcomas, lymphomas and neural tumors. It is also useful in detecting micrometastases in lymph nodes, bone marrow and other tissues and for determining the origin of poorly differentiated tumors. There are two types of cytokeratins the acidic type I cytokeratins and the basic or neutral type II cytokeratins. Cytokeratins are usually found in pairs comprising a type I cytokeratin and a type II cytokeratin. Usually the type II cytokeratins are 8kD larger than their type I counterparts.

ab170190 - Mouse monoclonal IgG1, is suitable for use as an isotype control with this antibody.

1/300.
ab6401 staining pan Cytokeratin in Mouse liver tumor tissue sections by IHC-P (Paraformaldehyde fixed paraffin embedded sections). Tissue was fixed with paraformaldehyde and blocked with maleate buffer blocking solution for 30 minutes and 22°C. Antigen retrieval was by heat mediation in citrate buffer. Samples were incubated with primary antibody (1/500) in maleate buffer blocking solution for 16 hours at 22°C. An undiluted biotin-conjugated Donkey polyclonal to mouse IgG was used as secondary antibody.

**Lane 1**: Anti-pan Cytokeratin antibody [PCK-26] (ab6401) at 2.5 µg/ml  
**Lane 2**: Anti-pan Cytokeratin antibody [PCK-26] (ab6401) at 5 µg/ml  
**Lane 3**: Anti-pan Cytokeratin antibody [PCK-26] (ab6401) at 10 µg/ml  

**All lanes**: HeLa cell lysate

**Secondary**  
**All lanes**: Peroxidase-conjugated goat anti-mouse IgG
**Immunocytochemistry/Immunofluorescence - Anti-pan Cytokeratin antibody [PCK-26] (ab6401)**

This image is courtesy of an anonymous Abreview.

Cells were fixed with acetone/methanol (1:1) and blocked with 1% BSA for 1 hour at room temperature. Samples were incubated with primary antibody (1/300 in PBS) for 2 hours. An Alexa Fluor®488-conjugated DGoat anti-mouse IgG polyclonal (1/1000) was used as the secondary antibody. Nuclei were counterstained with DAPI.

**Western blot - Anti-pan Cytokeratin antibody [PCK-26] (ab6401)**

**All lanes:** pan Cytokeratin antibody (ab6401) at 1/1000 dilution + whole cell lysate of Primary mouse pancreatic cancer cell lines (35 µg)

**Secondary:** An HRP-conjugated Sheep anti-mouse IgG polyclonal (1/5000) developed using the ECL technique

Performed under non-reducing conditions.

**Blocking Step:** 10% Milk for 1 hour at room temperature
Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-pan Cytokeratin antibody [PCK-26] (ab6401)

This image is courtesy of an anonymous Abreview.

ab6401 staining pan Cytokeratin in mouse pancreatic ductal adenocarcinoma (left-hand panel) and mouse pancreatic neoplasia (right-hand panel) sections by immunohistochemistry (IHC-P - paraformaldehyde-fixed, paraffin-embedded sections). Tissue samples were fixed with paraformaldehyde and blocked with 10% serum for 1 hour at room temperature; heat-mediated antigen retrieval was performed. The sample was incubated with primary antibody (1/250) at 4°C for 8 hours. A Biotin-conjugated Goat polyclonal (1/1000) was used as the secondary antibody.

Immunohistochemistry (Frozen sections) - Anti-pan Cytokeratin antibody [PCK-26] (ab6401)

This image is courtesy of an anonymous Abreview.

ab6401 staining pan Cytokeratin in Mouse pancreatic neoplasia tissue sections by Immunohistochemistry (IHC-Fr - frozen sections). Tissue was fixed with paraformaldehyde and blocked with 1% BSA for 1 hour at room temperature. Samples were incubated with primary antibody (1/250 in PBS) for 8 hours at 4°C. An Alexa Fluor® 488-conjugated goat anti-mouse IgG polyclonal (1/1000) was used as the secondary antibody.

Please note: All products are "FOR RESEARCH USE ONLY AND ARE NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions
Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
