**Product datasheet**

**Anti-PCK1/PEPC antibody ab28455**

**Overview**

- **Product name**: Anti-PCK1/PEPC antibody
- **Description**: Rabbit polyclonal to PCK1/PEPC
- **Host species**: Rabbit
- **Tested applications**: Suitable for: IHC-P, ICC/IF, WB
- **Species reactivity**: Reacts with: Mouse, Rat, Sheep, Human, Monkey
  Predicted to work with: Rabbit, Horse, Chicken, Guinea pig, Cow, Cat, Dog, Pig, Caenorhabditis elegans
- **Immunogen**: Synthetic peptide corresponding to Human PCK1/PEPC aa 330-379.
- **Positive control**: Jurkat whole cell lysate (ab7899), Human kidney
- **General notes**: This product was previously labelled as PCK1

**Properties**

- **Form**: Liquid
- **Storage instructions**: Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles.
- **Storage buffer**: Preservative: 0.09% Sodium azide
  Constituents: 2% Sucrose, PBS
- **Purity**: Immunogen affinity purified
- **Clonality**: Polyclonal
- **Isotype**: IgG

**Applications**

Our Abpromise guarantee covers the use of ab28455 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

**Function**
Catalyzes the conversion of oxaloacetate (OAA) to phosphoenolpyruvate (PEP), the rate-limiting step in the metabolic pathway that produces glucose from lactate and other precursors derived from the citric acid cycle.

**Tissue specificity**
Major sites of expression are liver, kidney and adipocytes.

**Pathway**
Carbohydrate biosynthesis; gluconeogenesis.

**Involvement in disease**
Defects in PCK1 are the cause of cytosolic phosphoenolpyruvate carboxykinase deficiency (cytosolic PEPCK deficiency) [MIM:261680]. PEPCK deficiency is a metabolic disorder resulting from impaired gluconeogenesis. It is a rare disease with less than 10 cases reported in the literature. Clinical characteristics include hypotonia, hepatomegaly, failure to thrive, lactic acidosis and hypoglycemia. Autopsy reveals fatty infiltration of both the liver and kidneys. The disorder is transmitted as an autosomal recessive trait.

**Sequence similarities**
Belongs to the phosphoenolpyruvate carboxykinase [GTP] family.

**Post-translational modifications**
Acetylation is increased on addition of glucose and appears to regulate the protein stability.

**Cellular localization**
Cytoplasm.

Western Blot using ab28455 at 1.0ug/ml. Sample type: Hum. Fetal Heart Lysate

Western blot - Anti-PCK1/PEPC antibody (ab28455)
Western Blot using ab28455 at 1.0ug/ml. Sample type: Hum. Fetal Liver Lysate

Western Blot using ab28455 at 1.0ug/ml. Sample type: Hum. Fetal Lung Lysate

Western Blot using ab28455 at 1.0ug/ml. Sample type: Hum. Fetal Muscle Lysate
Western Blot using ab28455 at 1.0µg/ml. Sample type: Human MCF7 cell Lysate

Western Blot using ab28455 at 1.0µg/ml. Sample type: Human Jurkat cell Lysate

Anti-PCK1/PEPC antibody (ab28455) at 1.25 µg/ml + Jurkat cell lysate

Secondary
HRP conjugated anti-Rabbit IgG diluted in 1:50,000-100,000

Predicted band size: 69 kDa
Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-PCK1/PEPC antibody (ab28455)

Antibody concentration: 4 - 8 μg/ml
Paraffin-embedded Tissue: Human Kidney Cells with positive label: Epithelial cells of renal tubule (indicated with arrows)
Magnification: x400

Immunocytochemistry/ Immunofluorescence - Anti-PCK1/PEPC antibody (ab28455)

ICC/IF image of ab28455 stained HeLa cells. The cells were 4% PFA fixed (10 min) and then incubated in 1%BSA / 10% normal goat serum / 0.3M glycine in 0.1% PBS-Tween for 1h to permeabilise the cells and block non-specific protein-protein interactions. The cells were then incubated with the antibody (ab28455, 5μg/ml) overnight at +4°C. The secondary antibody (green) was Alexa Fluor® 488 goat anti-rabbit IgG (H+L) used at a 1/1000 dilution for 1h. Alexa Fluor® 594 WGA was used to label plasma membranes (red) at a 1/200 dilution for 1h. DAPI was used to stain the cell nuclei (blue) at a concentration of 1.43μM.

Please note: All products are "FOR RESEARCH USE ONLY AND ARE NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
