Overview

Product name  Picro Sirius Red Stain Kit (Connective Tissue Stain)
Sample type  Tissue sections
Assay time  1h 00m

Product overview  Picro-Sirius Red Stain Kit (Connective Tissue Stain) ab150681 is intended for use in the histological visualization of collagen I and III fibers in addition to muscle in tissue sections.

The picro sirius red staining may be viewed using standard light microscopy.

Picro sirius red staining has traditionally sometimes been used with polarized light to more easily differentiate the collagen fibres from the background. Studies have used the differences between the appearance of different collagen fibres under polarized light to differentiate between different types of collagen fibres; it is unclear if the differences in appearance of the fibres is due to orientation, thickness and packing of the fibres rather than reflecting different types of collagen fibers.

Picro sirius red staining protocol summary:
- deparaffinize sections if necessary and hydrate in distilled water
- cover sections in picro-sirius red solution and incubate for 60 min
- wash slide with acetic acid solution
- wash slide with absolute alcohol
- dehydrate, clear and mount slide

Other products for staining tissue sections

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

**Terms and conditions**

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
