

Product datasheet

Sodium 4-phenylbutyrate, Histone deacetylase inhibitor ab141253

[2 References](#) [3 Images](#)

Overview

Product name	Sodium 4-phenylbutyrate, Histone deacetylase inhibitor
Description	Histone deacetylase inhibitor
Biological description	Histone deacetylase (HDAC) inhibitor. Able to induce apoptosis, differentiation and promote the maturation of a variety of malignant cells. Inhibits glioma cell proliferation.
Purity	> 99%
CAS Number	1716-12-7
Chemical structure	

Properties

Chemical name	4-Phenylbutyric acid sodium salt
Molecular weight	186.18
Molecular formula	C ₁₀ H ₁₁ NaO ₂
PubChem identifier	5258
Storage instructions	Store at -20°C. Store under desiccating conditions. The product can be stored for up to 12 months.
Solubility overview	Soluble in water to 100 mM and in DMSO to 25 mM
Handling	<p>Wherever possible, you should prepare and use solutions on the same day. However, if you need to make up stock solutions in advance, we recommend that you store the solution as aliquots in tightly sealed vials at -20°C. Generally, these will be useable for up to one month. Before use, and prior to opening the vial we recommend that you allow your product to equilibrate to room temperature for at least 1 hour.</p> <p>Refer to SDS for further information</p> <p>Need more advice on solubility, usage and handling? Please visit our frequently asked questions (FAQ) page for more details.</p>
SMILES	O=C(CCCc1ccccc1)O[Na]
Source	Synthetic

Applications

The Abpromise guarantee

Our [Abpromise guarantee](#) covers the use of ab141253 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
Functional Studies		Use at an assay dependent concentration.

Chemical Structure - Sodium 4-phenylbutyrate,
Histone deacetylase inhibitor (ab141253)

2D chemical structure image of ab141253, Sodium 4-phenylbutyrate, Histone deacetylase inhibitor

Immunocytochemistry/ Immunofluorescence -
Sodium 4-phenylbutyrate, Histone deacetylase
inhibitor (ab141253)

[ab70362](#) staining adiponectin receptor 1 in HepG2 cells treated with sodium 4-phenylbutyrate (ab141253), by ICC/IF. Increase of adiponectin receptor 1 expression correlates with increased concentration of sodium 4-phenylbutyrate, as described in literature. The cells were incubated at 37°C for 6 hours in media containing different concentrations of ab141253 (sodium 4-phenylbutyrate) in DMSO, fixed with 4% formaldehyde for 10 minutes at room temperature and blocked with PBS containing 10% goat serum, 0.3 M glycine, 1% BSA and 0.1% tween for 2h at room temperature. Staining of the treated cells with [ab70362](#) (5 µg/ml) was performed overnight at 4°C in PBS containing 1% BSA and 0.1% tween. A DyLight 488 anti-rabbit polyclonal antibody ([ab96899](#)) at 1/250 dilution was used as the secondary antibody. Nuclei were counterstained with DAPI and are shown in blue.

The effect of sodium phenylbutyrate (NB) and sodium valproate (NV) on the expression of AHSP in K562 cells. 2D, two days of treatment; 4D, four days of treatment; 6D, six days of treatment.

Cellular activation - Sodium 4-phenylbutyrate,

Histone deacetylase inhibitor (ab141253)

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <https://www.abcam.com/abpromise> or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
- Abcam biochemicals are novel compounds and we have not tested their biological activity in house. Please use the literature to identify how to use these products effectively. If you require further assistance please contact the scientific support team
