Overview

Product name
Anti-alpha Tubulin antibody - Loading Control

Description
Rabbit polyclonal to alpha Tubulin - Loading Control

Host species
Rabbit

Specificity
This antibody detects a single band in cell lines, corresponding to alpha tubulin.

Tested applications
Suitable for: WB, ICC/IF

Species reactivity
Reacts with: Mouse, Rat, Chicken, Cow, Human, Chinese hamster

Predicted to work with: Pig, Xenopus laevis, Chimpanzee, Monkey, Zebrafish

Immunogen
Synthetic peptide. This information is proprietary to Abcam and/or its suppliers.

Positive control
WB: HeLa, NIH 3T3, and PC12 cell lysates. ICC/IF: HeLa cells. IHC-P: Human endometrium tissue.

General notes
The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.

If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As

Properties

Form
Liquid

Storage instructions
Shipped at 4°C. Store at +4°C short term (1-2 weeks). Upon delivery aliquot. Store at -20°C or -80°C. Avoid freeze / thaw cycle.

Storage buffer
pH: 7.40
Preservative: 0.02% Sodium azide
Constituent: PBS

Batches of this product that have a concentration < 1mg/ml may have BSA added as a stabilising agent. If you would like information about the formulation of a specific lot, please contact our scientific support team who will be happy to help.

Purity
Immunogen affinity purified
Primary antibody notes
This antibody makes an excellent loading control.

Clonality
Polyclonal

Isotype
IgG

Applications

The Abpromise guarantee
Our Abpromise guarantee covers the use of ab4074 in the following tested applications. The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Target

Function
Tubulin is the major constituent of microtubules. It binds two moles of GTP, one at an exchangeable site on the beta chain and one at a non-exchangeable site on the alpha chain.

Sequence similarities
Belongs to the tubulin family.

Post-translational modifications
Some glutamate residues at the C-terminus are polyglutamylated. This modification occurs exclusively on glutamate residues and results in polyglutamate chains on the gamma-carboxyl group. Also monoglycylated but not polyglycylated due to the absence of functional TTLL10 in human. Monoglycylation is mainly limited to tubulin incorporated into axonemes (cilia and flagella) whereas glutamylation is prevalent in neuronal cells, centrioles, axonemes, and the mitotic spindle. Both modifications can coexist on the same protein on adjacent residues, and lowering glycylation levels increases polyglutamylation, and reciprocally. The precise function of such modifications is still unclear but they regulate the assembly and dynamics of axonemal microtubules.

Acetylation of alpha chains at Lys-40 stabilizes microtubules and affects affinity and processivity of microtubule motors. This modification has a role in multiple cellular functions, ranging from cell motility, cell cycle progression or cell differentiation to intracellular trafficking and signaling.

Cellular localization
Cytoplasm > cytoskeleton.

Images
ab4074 staining alpha Tubulin in HeLa cells. The cells were fixed with 4% paraformaldehyde (10 min), permeabilized with 0.1% PBS-Triton X-100 for 5 minutes and then blocked with 1% BSA/10% normal goat serum/0.3M glycine in 0.1% PBS-Tween for 1h. The cells were then incubated overnight at 4°C with ab4064 at 1µg/ml and ab7291, Mouse monoclonal [DM1A] to alpha Tubulin - Loading Control. Cells were then incubated with ab150081, Goat polyclonal Secondary Antibody to Rabbit IgG - H&L (Alexa Fluor® 488), pre-adsorbed at 1/1000 dilution (shown in green) and ab150120, Goat polyclonal Secondary Antibody to Mouse IgG - H&L (Alexa Fluor® 594), pre-adsorbed at 1/1000 dilution (shown in pseudocolour red). Nuclear DNA was labelled with DAPI (shown in blue).

Also suitable in cells fixed with 100% methanol (5 min).

Image was acquired with a high-content analyser (Operetta CLS, Perkin Elmer) and a maximum intensity projection of confocal sections is shown.

All lanes: Anti-alpha Tubulin antibody - Loading Control (ab4074) at 1 µg/ml

Lane 1: HeLa (Human epithelial carcinoma cell line) Whole Cell Lysate (ab27252)
Lane 2: NIH/3T3 (Mouse) Whole Cell Lysate (ab52956)
Lane 3: PC-12 (Rat adrenal pheochromocytoma cell line) Whole Cell Lysate (ab50957)

Lysates/proteins at 10 µg per lane.

Secondary

All lanes: Goat polyclonal to Rabbit IgG - H&L - Pre-Adsorbed (HRP) (ab65484) at 1/3000 dilution

Performed under reducing conditions.

Predicted band size: 50 kDa
Immunocytochemistry of SisNPFR-C6E8 cell line. Cells were prefixed in freshly prepared 4% paraformaldehyde (PFA) in F12 K culture medium with 10% fetal bovine serum and Geneticin. Fixed cells were permeabilized in PBST (0.25% Triton X-100 in PBS) for 5 min and blocked at 4°C overnight in 5% normal goat serum. The cells were then incubated at 4°C overnight with ab4074 (1:50). Cover slips were placed onto slides and mounted with VectaShield containing DAPI.

**All lanes**: Anti-alpha Tubulin antibody - Loading Control (ab4074) at 1 µg/ml

**Lane 1**: HeLa (Human epithelial carcinoma cell line) Whole Cell Lysate (ab27252)

**Lane 2**: HEK-293 (Human) Whole Cell Lysate (ab52256)

**Lane 3**: NIH/3T3 whole cell lysate (ab7179)

**Lane 4**: PC-12 (Rat adrenal pheochromocytoma cell line) Whole Cell Lysate (ab50957)

**Lane 5**: HeLa (Human epithelial carcinoma cell line) Whole Cell Lysate (ab27252) with Human alpha Tubulin peptide (ab23537) at 1 µg/ml

**Lane 6**: HEK-293 (Human) Whole Cell Lysate (ab52256) with Human alpha Tubulin peptide (ab23537) at 1 µg/ml

**Lane 7**: NIH/3T3 whole cell lysate (ab7179) with Human alpha Tubulin peptide (ab23537) at 1 µg/ml

**Lane 8**: PC-12 (Rat adrenal pheochromocytoma cell line) Whole Cell Lysate (ab50957) with Human alpha Tubulin peptide (ab23537) at 1 µg/ml

Lysates/proteins at 20 µg per lane.

**Secondary**

**All lanes**: Goat polyclonal to Rabbit IgG - H&L - Pre-Adsorbed (HRP) (ab65484) at 1/3000 dilution

Performed under reducing conditions.
**Predicted band size:** 50 kDa

**All lanes :** Anti-alpha Tubulin antibody - Loading Control (ab4074) at 1 µg/ml

**Lane 1 :** Mouse 3T3 lysate
**Lane 2 :** Rat liver lysate
**Lane 3 :** Cow cell lysate
**Lane 4 :** Chicken cell lysate
**Lane 5 :** CHO lysate

Lysates/proteins at 20 µg per lane.

**Secondary**
**All lanes :** Goat Anti-Rabbit IgG H&L (HRP) (ab6721) at 1/5000 dilution

Developed using the ECL technique.

Performed under reducing conditions.

**Predicted band size:** 50 kDa
**Observed band size:** 50 kDa

**Exposure time:** 30 seconds

ab4074 cross-reacts strongly with Mouse 3T3 lysate and shows weak cross-reactivity with Rat liver, Cow, Chicken and CHO lysates.

**Please note:** All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

**Our Abpromise to you: Quality guaranteed and expert technical support**
- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards
If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
