Anti-HDAC5 (phospho S498) antibody ab47283

* ★ ★ ★ ★ 1 Abreviews 14 References 2 Images

Overview

Product name Anti-HDAC5 (phospho S498) antibody

Description Rabbit polyclonal to HDAC5 (phospho S498)

Host species Rabbit

Tested applications Suitable for: ELISA, WB, IHC-P

Species reactivity Reacts with: Mouse, Human

Predicted to work with: Rat

Immunogen Synthetic peptide corresponding to Human HDAC5 (phospho S498). Immunogen range: 464-513

Database link: Q9UQL6

Positive control NIH/3T3 cell extracts; Breast carcinoma tissue

General notesThe Life Science industry has been in the grips of a reproducibility crisis for a number of years.

Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets

your needs before purchasing.

If you have any questions, special requirements or concerns, please send us an inquiry and/or

contact our Support team ahead of purchase. Recommended alternatives for this product can be

found below, along with publications, customer reviews and Q&As

Properties

Form Liquid

Storage instructions Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles.

Storage buffer pH: 7.40

Preservative: 0.02% Sodium azide

Constituents: PBS, 50% Glycerol, 0.87% Sodium chloride

Purity Immunogen affinity purified

Purification notesThe antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-

specific phosphopeptide. The antibody against non-phosphopeptide was removed by chromatography using non-phosphopeptide corresponding to the phosphorylation site.

Clonality Polyclonal

Isotype IgG

1

Applications

The Abpromise quarantee

Our Abpromise guarantee covers the use of ab47283 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
ELISA		Use at an assay dependent concentration.
WB	★★★★☆ (1)	1/500 - 1/1000. Detects a band of approximately 118 kDa (predicted molecular weight: 122 kDa).
IHC-P		Use at an assay dependent concentration.

Target

Function

Responsible for the deacetylation of lysine residues on the N-terminal part of the core histones (H2A, H2B, H3 and H4). Histone deacetylation gives a tag for epigenetic repression and plays an important role in transcriptional regulation, cell cycle progression and developmental events. Histone deacetylases act via the formation of large multiprotein complexes. Involved in muscle maturation by repressing transcription of myocyte enhancer MEF2C. During muscle differentiation, it shuttles into the cytoplasm, allowing the expression of myocyte enhancer factors.

Tissue specificity

Ubiquitous.

Sequence similarities

Belongs to the histone deacetylase family. HD type 2 subfamily.

Domain

The nuclear export sequence mediates the shuttling between the nucleus and the cytoplasm.

Post-translational modifications

Phosphorylated by CaMK at Ser-259 and Ser-498. The phosphorylation is required for the export to the cytoplasm. Phosphorylated by the PKC kinases PKN1 and PKN2, impairing nuclear import.

 $\label{thm:local_polyubiquitination} \mbox{ However does not lead to its degradation.}$

Cellular localization

Nucleus. Cytoplasm. Shuttles between the nucleus and the cytoplasm. In muscle cells, it shuttles into the cytoplasm during myocyte differentiation. The export to cytoplasm depends on the interaction with a 14-3-3 chaperone protein and is due to its phosphorylation at Ser-259 and Ser-

498 by CaMK.

Images

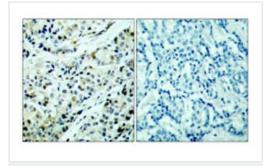

Western blot - Anti-HDAC5 (phospho S498) antibody (ab47283)

All lanes : Anti-HDAC5 (phospho S498) antibody (ab47283) at 1/500 dilution

Lane 1: Extracts from NIH/ 3T3 cells

Lane 2: Extracts from NIH/ 3T3 cells; ab47283 preincubated with immunising peptide (blocking)

Predicted band size: 122 kDa **Observed band size:** 118 kDa

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-HDAC5 (phospho S498) antibody (ab47283)

ab47283 (1/100) staining HDAC5 (phospho S498) in paraffin embedded human breast carcinoma tissue. For the right hand panel, ab47283 was pre-incubated with the immunizing peptide (blocking).

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours

- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

• Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
