Anti-HNF-1B antibody [EPR18644-13] ab213149

★★★★ 1 Abreviews 9 Images

Overview

Product name Anti-HNF-1B antibody [EPR18644-13]

Description Rabbit monoclonal [EPR18644-13] to HNF-1B

Host species Rabbit

Tested applications Suitable for: IHC-P

Species reactivity Reacts with: Mouse, Rat, Human

Immunogen Recombinant fragment. This information is proprietary to Abcam and/or its suppliers.

Positive control IHC-P: Human liver, liver bile duct carcinoma and ovarian clear cell carcinoma tissues. Mouse and

rat liver tissues.

General notes This product is a recombinant monoclonal antibody, which offers several advantages including:

- High batch-to-batch consistency and reproducibility

- Improved sensitivity and specificity

- Long-term security of supply

- Animal-free production

For more information **see here**.

Our RabMAb® technology is a patented hybridoma-based technology for making rabbit monoclonal antibodies. For details on our patents, please refer to **RabMAb**® **patents**.

Properties

Form Liquid

Storage instructions Shipped at 4°C. Store at +4°C short term (1-2 weeks). Upon delivery aliquot. Store at -20°C long

term. Avoid freeze / thaw cycle.

Storage buffer pH: 7.2

Preservative: 0.01% Sodium azide

Constituents: 59% PBS, 40% Glycerol (glycerin, glycerine), 0.05% BSA

Purity Protein A purified

Clonality Monoclonal Clone number EPR18644-13

Isotype ΙgG

Applications

The Abpromise quarantee

Our Abpromise guarantee covers the use of ab213149 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
IHC-P		1/2000. Perform heat mediated antigen retrieval with Tris/EDTA buffer pH 9.0 before commencing with IHC staining protocol.

Target

Function

Involvement in disease

Transcription factor, probably binds to the inverted palindrome 5'-GTTAATNATTAAC-3'.

Defects in HNF1B are the cause of renal cysts and diabetes syndrome (RCAD) [MIM:137920]; also called maturity-onset diabetes of the young type 5 (MODY5) or familial hypoplastic glomerulocystic kidney disease (GCKD). RCAD is an autosomal dominant disorder comprising non-diabetic renal disease resulting from abnormal renal development, and diabetes, which in some cases occurs earlier than age 25 years and is thus consistent with a diagnosis of maturity-onset diabetes of the young (MODY5). The renal disease is highly variable and includes renal cysts, glomerular tufts, aberrant nephrogenesis, primitive tubules, irregular collecting systems, oligomeganephronia, enlarged renal pelves, abnormal calyces, small kidney, single kidney, horseshoe kidney, and hyperuricemic nephropathy.

Defects in HNF1B may be rare genetic risk factor contributing to the development of non-insulindependent diabetes mellitus (NIDDM) [MIM:125853]. NIDDM is characterized by an autosomal dominant mode of inheritance, onset during adulthood and insulin resistance.

Defects in HNF1B may be a cause of susceptibility to prostate cancer hereditary type 11 (HPC11) [MIM:611955]. It is a condition associated with familial predisposition to cancer of the prostate. Most prostate cancers are adenocarcinomas that develop in the acini of the prostatic ducts. Other rare histopathologic types of prostate cancer that occur in approximately 5% of patients include small cell carcinoma, mucinous carcinoma, prostatic ductal carcinoma, transitional cell carcinoma, squamous cell carcinoma, basal cell carcinoma, adenoid cystic carcinoma (basaloid), signet-ring cell carcinoma and neuroendocrine carcinoma.

Sequence similarities

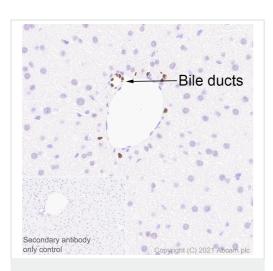

Belongs to the HNF1 homeobox family.

Contains 1 homeobox DNA-binding domain.

Cellular localization

Nucleus.

Images

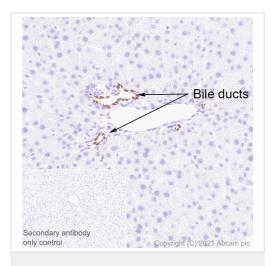

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-HNF-1B antibody
[EPR18644-13] (ab213149)

Immunohistochemical analysis of paraffin-embedded mouse liver tissue labeling HNF-1B with ab213149 at 1/4000 dilution, followed by LeicaDS9800 (Bond™ Polymer Refine Detection). Nuclear staining on mouse liver bile duct is observed. Counter stained with Hematoxylin.

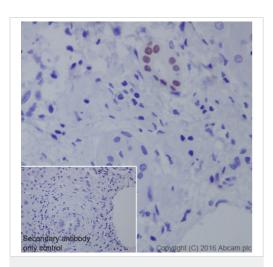

Secondary antibody only control: Used PBS instead of primary antibody

Perform heat mediated antigen retrieval with Tris/EDTA buffer pH 9.0 before commencing with IHC staining protocol.

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-HNF-1B antibody
[EPR18644-13] (ab213149)

Immunohistochemical analysis of paraffin-embedded rat liver tissue labeling HNF-1B with ab213149 at 1/4000 dilution, followed by LeicaDS9800 (Bond™ Polymer Refine Detection). Nuclear staining on rat liver bile duct is observed. Counter stained with Hematoxylin. Secondary antibody only control: Used PBS instead of primary antibody

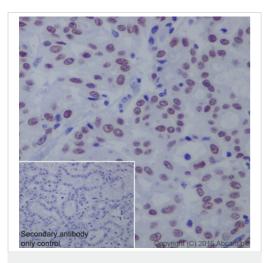

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-HNF-1B antibody
[EPR18644-13] (ab213149)

Immunohistochemical analysis of paraffin-embedded human liver tissue labeling HNF-1B with ab213149 at 1/2000 dilution, followed by Goat Anti-Rabbit IgG H&L (HRP) at 1/500 dilution. Nuclear staining on human liver bile duct is observed. Counter stained with Hematoxylin.

Secondary antibody only control: Used PBS instead of primary antibody, secondary antibody is Goat Anti-Rabbit IgG H&L (HRP) at 1/500 dilution.

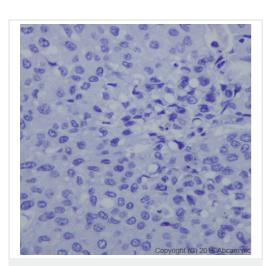

Perform heat mediated antigen retrieval with Tris/EDTA buffer pH 9.0 before commencing with IHC staining protocol.

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-HNF-1B antibody
[EPR18644-13] (ab213149)

Immunohistochemical analysis of paraffin-embedded human liver bile duct carcinoma tissue labeling HNF-1B with ab213149 at 1/2000 dilution, followed by Goat Anti-Rabbit lgG H&L (HRP) at 1/500 dilution. Nuclear staining on human liver bile duct carcinoma is observed. Counter stained with Hematoxylin.

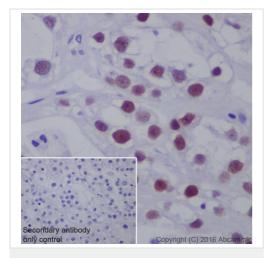

Secondary antibody only control: Used PBS instead of primary antibody, secondary antibody is Goat Anti-Rabbit lgG H&L (HRP) at 1/500 dilution.

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-HNF-1B antibody
[EPR18644-13] (ab213149)

Immunohistochemical analysis of paraffin-embedded human hepatocellular carcinoma tissue labeling HNF-1B with ab213149 at 1/2000 dilution, followed by Goat Anti-Rabbit IgG H&L (HRP) at 1/500 dilution. Negative staining on human hepatocellular carcinoma. Counter stained with Hematoxylin.

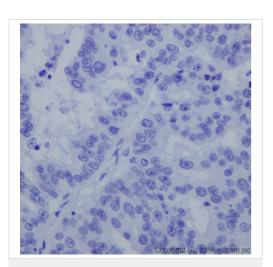

Perform heat mediated antigen retrieval with Tris/EDTA buffer pH 9.0 before commencing with IHC staining protocol.

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-HNF-1B antibody
[EPR18644-13] (ab213149)

Immunohistochemical analysis of paraffin-embedded human ovarian clear cell carcinoma tissue labeling HNF-1B with ab213149 at 1/2000 dilution, followed by Goat Anti-Rabbit lgG H&L (HRP) at 1/500 dilution. Nuclear staining on human ovarian clear cell carcinoma is observed. Counter stained with Hematoxylin.

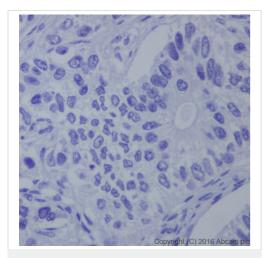

Secondary antibody only control: Used PBS instead of primary antibody, secondary antibody is Goat Anti-Rabbit lgG H&L (HRP) at 1/500 dilution.

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-HNF-1B antibody
[EPR18644-13] (ab213149)

Immunohistochemical analysis of paraffin-embedded human serous ovarian carcinoma tissue labeling HNF-1B with ab213149 at 1/2000 dilution, followed by Goat Anti-Rabbit IgG H&L (HRP) at 1/500 dilution. Negative staining on human serous ovarian carcinoma. Counter stained with Hematoxylin.

Perform heat mediated antigen retrieval with Tris/EDTA buffer pH 9.0 before commencing with IHC staining protocol.

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections) - Anti-HNF-1B antibody
[EPR18644-13] (ab213149)

Immunohistochemical analysis of paraffin-embedded human endometrioid ovary adenocarcinoma tissue labeling HNF-1B with ab213149 at 1/2000 dilution, followed by Goat Anti-Rabbit lgG H&L (HRP) at 1/500 dilution. Negative staining on human endometrioid ovary adenocarcinoma. Counter stained with Hematoxylin.

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- · We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

• Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
