<tbody>
<tr>
<td>Description</td>
<td>Mouse monoclonal [20C11B11B11] to NDUFA9</td>
</tr>
<tr>
<td>Host species</td>
<td>Mouse</td>
</tr>
<tr>
<td>Tested applications</td>
<td>Suitable for: IHC-P, WB, Flow Cyt</td>
</tr>
<tr>
<td>Species reactivity</td>
<td>Reacts with: Mouse, Rat, Cow, Human</td>
</tr>
<tr>
<td>Immunogen</td>
<td>Tissue, cells or virus corresponding to Cow NDUFA9.</td>
</tr>
<tr>
<td>General notes</td>
<td>This monoclonal antibody to NDUFA9 has been knockout validated in Western blot. The expected band for NDUFA9 was observed in wild type cells and the band was not seen in knockout cells. This antibody clone is manufactured by Abcam. If you require a custom buffer formulation or conjugation for your experiments, please contact <a href="mailto:orders@abcam.com">orders@abcam.com</a>. The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing. If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&amp;As</td>

<tbody>
<tr>
<td>Storage instructions</td>
<td>Shipped at 4°C. Store at +4°C.</td>
</tr>
</tbody>
</table>
| Storage buffer        | pH: 7.4  
                        | Preservative: 0.02% Sodium azide |
|                       | Constituent: HEPES buffered saline |
| Purity                | IgG fraction |
| Purification notes    | Near homogeneity as judged by SDS-PAGE. The antibody was produced in vitro using |
hybridomas grown in serum-free medium, and then purified by biochemical fractionation.

Clonality
Monoclonal

Clone number
20C11B11B11

Isotype
IgG1

Light chain type
kappa

Applications

The Abpromise guarantee
Our Abpromise guarantee covers the use of ab14713 in the following tested applications. The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

</table>

Target

Function
Accessory subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I), that is believed not to be involved in catalysis. Complex I functions in the transfer of electrons from NADH to the respiratory chain. The immediate electron acceptor for the enzyme is believed to be ubiquinone.

Sequence similarities
Belongs to the complex I NDUFA9 subunit family.

Cellular localization
Mitochondrion matrix.

Images
**Western blot - Anti-NDUFA9 antibody**

Lane 1: Wild-type HAP1 cell lysate (20 µg)
Lane 2: NDUFA9 knockout HAP1 cell lysate (20 µg)
Lane 3: WI38 cell lysate (20 µg)
Lane 4: NIH3T3 cell lysate (20 µg)

Lanes 1 - 4: Merged signal (red and green). Green - ab14713 observed at 40 kDa. Red - loading control, **ab176560**, observed at 52 kDa.

ab14713 was shown to specifically react with NDUFA9 in wild-type HAP1 cells. No band was observed when NDUFA9 knockout HAP1 samples were used. Wild-type and NDUFA9 knockout samples were subjected to SDS-PAGE. ab14713 and **ab176560** (loading control to alpha tubulin) were diluted at 1µg/mL and 1/10,000 respectively and incubated overnight at 4°C. Blots were developed with Goat anti-Mouse IgG H&L (IRDye® 800CW) preadsorbed (**ab216772**) and Goat Anti-Rabbit IgG H&L (IRDye® 680RD) preadsorbed (**ab216777**) secondary antibodies at 1/10,000 dilution for 1 hour at room temperature before imaging.

**Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-NDUFA9 antibody**

ab14713 a 1/100 dilution staining NDUFA9 in Human spinal column tissue by Immunohistochemistry (Formalin/PFA-Fixed paraffin-embedded sections). Antibody was incubated with the sample for 1 hour. Sections were incubated in peroxidase-conjugated rabbit anti-mouse secondary (diluted 1/100 in 4% BSA in PBST) for 1 hour at room temperature. Sections were washed x3 in PBST and peroxidase activity was demonstrated using kit. Antigen retrieval was performed by 1 minute of pressure cooking with 1 mmol EDTA pH 8.0.
Overlay histogram showing HepG2 cells stained with ab14713 (red line). The cells were fixed with 80% methanol (5 min) and then permeabilized with 0.1% PBS-Tween for 20 min. The cells were then incubated in 1x PBS / 10% normal goat serum / 0.3M glycine to block non-specific protein-protein interactions followed by the antibody (ab14713, 2µg/1x10^6 cells) for 30 min at 22ºC. The secondary antibody used was DyLight® 488 goat anti-mouse IgG (H+L) (ab96879) at 1/500 dilution for 30 min at 22ºC. Isotype control antibody (black line) was Mouse IgG1 [ICIGG1] (ab91353, 2µg/1x10^6 cells) used under the same conditions. Acquisition of >5,000 events was performed.

**All lanes**: Anti-NDUFA9 antibody [20C11B11B11] (ab14713) at 1 µg/ml

- **Lane 1**: WI38 (Human lung fibroblast cell line) Whole Cell Lysate
- **Lane 2**: Human testis tissue lysate - total protein (ab30257)
- **Lane 3**: NIH 3T3 (Mouse embryonic fibroblast cell line) Whole Cell Lysate

Lysates/proteins at 10 µg per lane.

**Secondary**

**All lanes**: Goat polyclonal to Mouse IgG - H&L - Pre-Adsorbed (HRP) at 1/3000 dilution

Developed using the ECL technique.

Performed under reducing conditions.

**Predicted band size**: 40 kDa

**Observed band size**: 36 kDa

**Additional bands at**: 58 kDa. We are unsure as to the identity of these extra bands.

**Exposure time**: 20 minutes

The band observed at 36 kDa could potentially be a cleaved form of NDUFA9 due to the presence of a 35 amino acid transit peptide.
Western blot - Anti-NDUFA9 antibody
[20C11B11B11] (ab14713)

All lanes: Anti-NDUFA9 antibody [20C11B11B11] (ab14713)

Lane 1: Isolated mitochondria from Human heart at 5 µg
Lane 2: Isolated mitochondria from Bovine heart at 1 µg
Lane 3: Isolated mitochondria from Rat heart at 10 µg
Lane 4: Isolated mitochondria from Mouse Heart at 10 µg

Secondary
All lanes: Goat anti-Mouse IgG

Predicted band size: 40 kDa
Observed band size: 37 kDa

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
