Product datasheet

Anti-Vimentin antibody ab137321

Overview

Product name: Anti-Vimentin antibody
Description: Rabbit polyclonal to Vimentin
Host species: Rabbit
Tested applications: Suitable for: WB, ICC/IF, IHC-P, IP
Species reactivity: Reacts with: Mouse, Rat, Human

Immunogen: Recombinant fragment within Human Vimentin (internal sequence). The exact sequence is proprietary.
Database link: P08670

Positive control:

General notes: The Life Science industry has been in the grips of a reproducibility crisis for a number of years. Abcam is leading the way in addressing this with our range of recombinant monoclonal antibodies and knockout edited cell lines for gold-standard validation. Please check that this product meets your needs before purchasing.

If you have any questions, special requirements or concerns, please send us an inquiry and/or contact our Support team ahead of purchase. Recommended alternatives for this product can be found below, along with publications, customer reviews and Q&As

Properties

Form: Liquid

Storage buffer: pH: 7.00
Preservative: 0.025% Proclin 300
 Constituents: 79% PBS, 20% Glycerol (glycerin, glycerine)

Purity: Affinity purified
Clonality: Polyclonal
Isotype: IgG
Applications

The Abpromise guarantee  Our Abpromise guarantee covers the use of ab137321 in the following tested applications. The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Target

Function  Vimentins are class-III intermediate filaments found in various non-epithelial cells, especially mesenchymal cells. Vimentin is attached to the nucleus, endoplasmic reticulum, and mitochondria, either laterally or terminally. Involved with LARP6 in the stabilization of type I collagen mRNAs for CO1A1 and CO1A2.

Tissue specificity  Highly expressed in fibroblasts, some expression in T- and B-lymphocytes, and little or no expression in Burkitt's lymphoma cell lines. Expressed in many hormone-independent mammary carcinoma cell lines.

Involvement in disease  Cataract 30

Sequence similarities  Belongs to the intermediate filament family.

Domain  The central alpha-helical coiled-coil rod region mediates elementary homodimerization. The [IL]-x-C-x-x-[DE] motif is a proposed target motif for cysteine S-nitrosylation mediated by the iNOS-S100A8/A9 transnitrosylase complex.

Post-translational modifications  Filament disassembly during mitosis is promoted by phosphorylation at Ser-55 as well as by nestin (By similarity). One of the most prominent phosphoproteins in various cells of mesenchymal origin. Phosphorylation is enhanced during cell division, at which time vimentin filaments are significantly reorganized. Phosphorylation by PKN1 inhibits the formation of filaments. Phosphorylated at Ser-56 by CDK5 during neutrophil secretion in the cytoplasm. Phosphorylated by STK33. O-glycosylated during cytokinesis at sites identical or close to phosphorylation sites, this interferes with the phosphorylation status. S-nitrosylation is induced by interferon-gamma and oxidatively-modified low-density lipoprotein (LDL(ox)) possibly implicating the iNOS-S100A8/9 transnitrosylase complex.

Cellular localization  Cytoplasm.

Form  Vimentin is found in connective tissue and in the cytoskeleton.

**All lanes**: HRP-conjugated anti-rabbit IgG

**Predicted band size**: 54 kDa

10% SDS-PAGE gel

Paraffin-embedded adult mouse retina tissue stained for Vimentin with ab137321 (1/250 dilution) (green) in immunohistochemical analysis.

Blue: Fluoroshield with DAPI.
Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-Vimentin antibody (ab137321)

Paraffin-embedded rat testis tissue stained for Vimentin with ab137321 at a 1/500 dilution in immunohistochemical analysis.

Paraffin-embedded mouse testis tissue stained for Vimentin with ab137321 at a 1/500 dilution in immunohistochemical analysis.
Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-Vimentin antibody (ab137321)

Paraffin-embedded mouse ovary tissue stained for Vimentin with ab137321 at a 1/500 dilution in immunohistochemical analysis.

Immunocytochemistry/ Immunofluorescence - Anti-Vimentin antibody (ab137321)

HeLa (human epithelial cell line from cervix adenocarcinoma) cells stained for Vimentin (green) using ab137321 (1/500 dilution) in ICC/IF. Cells were fixed in 4% paraformaldehyde at RT for 15 minutes. Counterstain: Hoechst 33342 (blue).
Vimentin was immunoprecipitated from HeLa (Human epithelial cell line from cervix adenocarcinoma) whole cell extracts using 5 µg of ab137321.

**Lane 1:** HeLa whole cell extracts (Input).

**Lane 2:** Control IgG in HeLa whole cell extracts.

**Lane 3:** Vimentin IP in HeLa whole cell extracts.

Paraffin-embedded human lung carcinoma tissue stained for Vimentin with ab137321 at a 1/500 dilution in immunohistochemical analysis.
Immunohistochemical analysis of paraffin-embedded, formalin-fixed RT2 rat xenograft tissue labeling Vimentin, using ab137321 at a 1/500 dilution.

Confocal immunofluorescence analysis of methanol-fixed HeLa (Human epithelial cell line from cervix adenocarcinoma) cells labeling Vimentin, using ab137321 (green) at a 1/500 dilution. Alpha-tubulin filaments were labelled with an anti-alpha tubulin antibody (red) at a 1/2000 dilution.

Anti-Vimentin antibody (ab137321) at 1/3000 dilution + HEK-293T (Human epithelial cell line from embryonic kidney transformed with large T antigen) whole cell lysate at 30 µg

**Predicted band size:** 54 kDa

Western blot - Anti-Vimentin antibody (ab137321)

7.5% SDS PAGE
**Western blot - Anti-Vimentin antibody (ab137321)**

**All lanes**: Anti-Vimentin antibody (ab137321) at 1/3000 dilution

**Lane 1**: HEK-293T (Human epithelial cell line from embryonic kidney transformed with large T antigen) whole cell lysate at 20 µg

**Lane 2**: HEK-293T (Human epithelial cell line from embryonic kidney transformed with large T antigen) whole cell lysate at 10 µg

**Lane 3**: HEK-293T (Human epithelial cell line from embryonic kidney transformed with large T antigen) whole cell lysate at 5 µg

**Predicted band size**: 54 kDa

**10% SDS PAGE**

**Western blot - Anti-Vimentin antibody (ab137321)**

Anti-Vimentin antibody (ab137321) at 1/1000 dilution + NIH-3T3 (Mouse embryo fibroblast cell line) whole cell lysate at 30 µg

**Predicted band size**: 54 kDa

**10% SDS Page**

Immunohistochemical analysis of paraffin-embedded, formalin-fixed U373 xenograft tissue labeling Vimentin, using ab137321 at a 1/500 dilution.

**Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) - Anti-Vimentin antibody (ab137321)**
Please note: All products are “FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES”

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit [https://www.abcam.com/abpromise](https://www.abcam.com/abpromise) or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
