Product datasheet

Native Mouse Vitronectin/S-Protein ab92727

1 Abreviews 4 References 1 Image

Description

Product name	Native Mouse Vitronectin/S-Protein
Purity	> 95 % SDS-PAGE. ab92727 was prepared from fresh Mouse plasma using urea as a denaturant.
Expression system	Native
Protein length	Full length protein
Animal free	No
Nature	Native
Species	Mouse

Specifications

Our **Abpromise guarantee** covers the use of **ab92727** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Applications	Functional Studies SDS-PAGE
Form	Liquid

Preparation and Storage

Stability and Storage	Shipped on dry ice. Upon delivery aliquot and store at -80ºC. Avoid freeze / thaw cycles. pH: 7.40 Constituents: 0.82% Sodium phosphate, 0.58% Sodium chloride

General Info

Function	Vitronectin is a cell adhesion and spreading factor found in serum and tissues. Vitronectin interact with glycosaminoglycans and proteoglycans. Is recognized by certain members of the integrin family and serves as a cell-to-substrate adhesion molecule. Inhibitor of the membrane-damaging effect of the terminal cytolytic complement pathway. Somatomedin-B is a growth hormone-dependent serum factor with protease-inhibiting activity.

Tissue specificity	Plasma.
Sequence similarities	Contains 4 hemopexin repeats. Contains 1 SMB (somatomedin-B) domain.
Domain	The SMB domain mediates interaction with SERPINE1/PAI1. The heparin-binding domain mediates interaction with insulin.
Post-translational modifications	Sulfated on 2 tyrosine residues. N- and O-glycosylated. Phosphorylation on Thr-69 and Thr-76 favors cell adhesion and spreading. It has been suggested that the active SMB domain may be permitted considerable disulfide bond heterogeneity or variability, thus two alternate disulfide patterns based on 3D structures are described with 1 disulfide bond conserved in both. Phosphorylation sites are present in the extracellular medium.
Cellular localization	Secreted, extracellular space.

SDS-PAGE - Native Mouse Vitronectin/S-Protein (ab92727)

10% SDS-PAGE showing ab92727

Lane 1 ab92727 Non-reduced (3µg)

Lane 2 ab92727 Reduced (3µg)

Lane 3 Molecular weight markers

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit **https://www.abcam.com/abpromise** or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
