

## Product datasheet

# Recombinant human IGF1 protein (Active) ab270062

★★★★★ [1 Abreviews](#) [5 References](#) [4 Images](#)

### Description

<b>Product name</b>	Recombinant human IGF1 protein (Active)
<b>Biological activity</b>	Fully biologically active as determined by dose-dependent proliferation of MCF-7 cells. ED <sub>50</sub> is ≤ 0.9 ng/mL, corresponding to a specific activity of 1.11 x 10 <sup>6</sup> units/mg.
<b>Purity</b>	≥ 95 % SDS-PAGE.
<b>Endotoxin level</b>	< 0.005 Eu/μg
<b>Expression system</b>	HEK 293 cells
<b>Accession</b>	<b><u>P05019</u></b>
<b>Protein length</b>	Full length protein
<b>Animal free</b>	Yes
<b>Carrier free</b>	Yes
<b>Nature</b>	Recombinant
<b>Species</b>	Human
<b>Sequence</b>	GP ETLCGAELVD ALQFVCGDRG FYFNKPTGYG SSSRRAPQTG IVDECCFRSC DLRRLEMYCA PLKPAKSA
<b>Predicted molecular weight</b>	8 kDa
<b>Molecular weight information</b>	M - 2.84 Da (Calculated mass 7711.84 Da) GP ETLCGAELVD ALQFVCGDRG FYFNKPTGYG SSSRRAPQTG IVDECCFRSC DLRRLEMYCA PLKPAKSA
<b>Amino acids</b>	49 to 118
<b>Additional sequence information</b>	N-terminal glycine Full-length mature chain lacking the signal peptide and both pro-peptides.

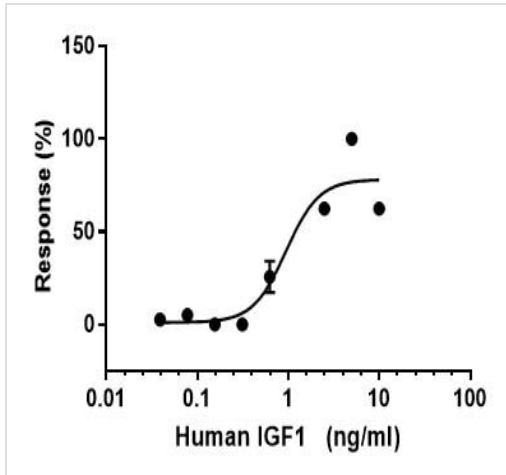

### Specifications

Our **Abpromise guarantee** covers the use of **ab270062** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

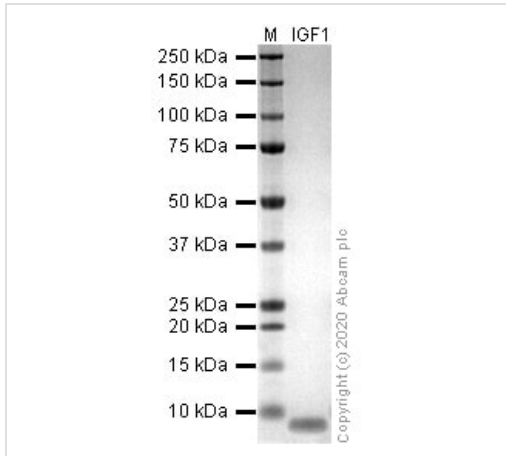

<b>Applications</b>	Cell Culture
	SDS-PAGE
	HPLC

	Mass Spectrometry
	Functional Studies
<b>Form</b>	Lyophilized
<b>Additional notes</b>	This protein is filter sterilized prior to aliquoting and lyophilization. All aliquoting and lyophilization steps are performed in a sterile environment
<b>Preparation and Storage</b>	
<b>Stability and Storage</b>	<p>Shipped at Room Temperature. Store at Room Temperature.</p> <p>pH: 6.00</p> <p>Constituents: 0.727% Dibasic monohydrogen potassium phosphate, 0.248% Monobasic dihydrogen potassium phosphate, 10.26% Trehalose</p> <p>Buffer lyophilized from.</p> <p>This product is an active protein and may elicit a biological response in vivo, handle with caution.</p>
<b>Reconstitution</b>	<p>Reconstitute with phosphate buffered saline. Store lyophilized form at room temperature.</p> <p>Reconstitute, aliquot and store at -80°C for 12 months or +4°C for 1 week. Avoid repeated freeze-thaw. Lyophilized contents may appear as either a translucent film or a white powder. This variance does not affect the quality of the product.</p>
<b>General Info</b>	
<b>Function</b>	The insulin-like growth factors, isolated from plasma, are structurally and functionally related to insulin but have a much higher growth-promoting activity. May be a physiological regulator of [1-14C]-2-deoxy-D-glucose (2DG) transport and glycogen synthesis in osteoblasts. Stimulates glucose transport in rat bone-derived osteoblastic (PyMS) cells and is effective at much lower concentrations than insulin, not only regarding glycogen and DNA synthesis but also with regard to enhancing glucose uptake.
<b>Involvement in disease</b>	Defects in IGF1 are the cause of insulin-like growth factor I deficiency (IGF1 deficiency) [MIM:608747]. IGF1 deficiency is an autosomal recessive disorder characterized by growth retardation, sensorineural deafness and mental retardation.
<b>Sequence similarities</b>	Belongs to the insulin family.
<b>Cellular localization</b>	Secreted.
<b>Images</b>	

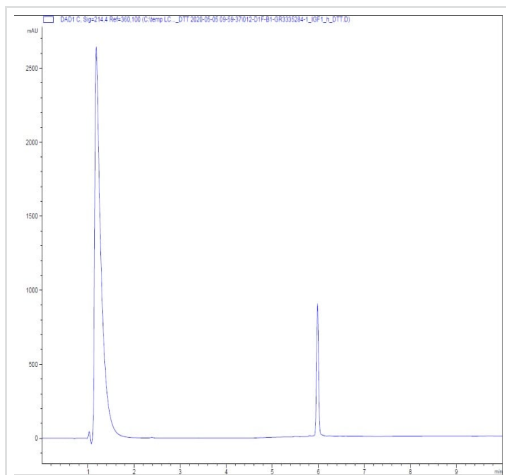

Fully biologically active as determined by dose-dependent proliferation of MCF-7 cells. The ED<sub>50</sub> is  $\leq 0.9$  ng/mL, corresponding to a specific activity of  $1.11 \times 10^6$  units/mg.

Functional Studies - Recombinant human IGF1 protein (Active) (ab270062)

SDS-PAGE analysis of ab270062.

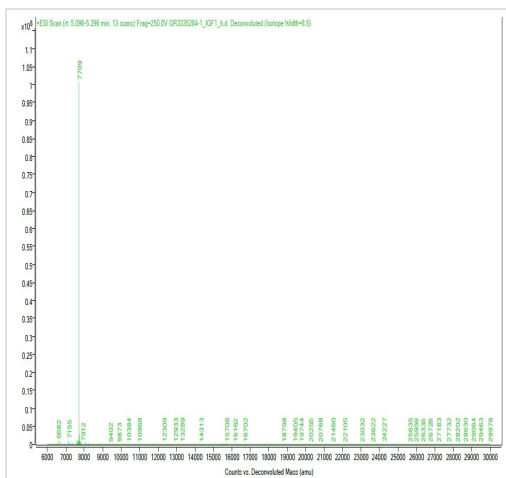

SDS-PAGE - Recombinant human IGF1 protein (Active) (ab270062)

HPLC - Recombinant human IGF1 protein (Active)  
(ab270062)

Purity  $\geq 95\%$

The spectrum was recorded using a 1260 Infinity II HPLC system with DAD and a MabPac RP column (3.0x100 mm, 4  $\mu$ m). 5  $\mu$ L of purified protein was injected and the gradient run from 80 % water:TFA (99.9:0.1 v/v) and 20 % acetonitrile:water:TFA (90:9.9:0.1 v/v/v) to 20 % water:TFA (99.9:0.1 v/v) and 80 % acetonitrile:water:TFA (90:9.9:0.1 v/v/v) within 3 minutes followed by an isocratic step for another 3 min. Flow rate was 0.5 mL/min and the column compartment temperature was 50  $^{\circ}$ C.

Mass Spectrometry - Recombinant human IGF1  
protein (Active) (ab270062)

M - 2.84 Da (Calculated mass 7711.84 Da)

The spectrum was recorded with a 6545XT AdvanceBio LC/Q-TOF (Agilent Technologies) and a MabPac RP column (42.1x50 mm, 4  $\mu$ m, Thermo Scientific). 5  $\mu$ L of purified protein was injected and the gradient run from 85 % water:FA (99.9:0.1 v/v) and 15 % acetonitrile:FA (90:9.9:0.1 v/v/v) to 55 % water:FA (99.9:0.1 v/v) and 45 % acetonitrile:FA (90:9.9:0.1 v/v/v) within 3 minutes followed by an isocratic step for another 2.5 min. Flow rate was 0.4 mL/min and the column compartment temperature was 60  $^{\circ}$ C. Data was analysed and deconvoluted using the Bioconfirm software (Agilent Technologies).

**Please note:** All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

## Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery

- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit <https://www.abcam.com/abpromise> or contact our technical team.

#### **Terms and conditions**

---

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
