This product is an active protein and may elicit a biological response in vivo, handle with caution.

**Reconstitution** Reconstitute with sterile deionized water to a concentration of 400 µg/ml.

#### **General Info**

**Function** Tyrosine-protein kinase receptor which may be involved in the early formation of the chondrocytes.

It seems to be required for cartilage and growth plate development. Phosphorylates YWHAB,

leading to induction of osteogenesis and bone formation.

Involvement in disease Brachydactyly B1

Robinow syndrome autosomal recessive

**Sequence similarities**Belongs to the protein kinase superfamily. Tyr protein kinase family. ROR subfamily.

Contains 1 FZ (frizzled) domain.

Contains 1 lg-like C2-type (immunoglobulin-like) domain.

Contains 1 kringle domain.

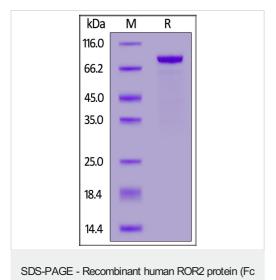

Contains 1 protein kinase domain.

**Developmental stage** Expressed at high levels during early embryonic development. The expression levels drop strongly

around day 16 and there are only very low levels in adult tissues.

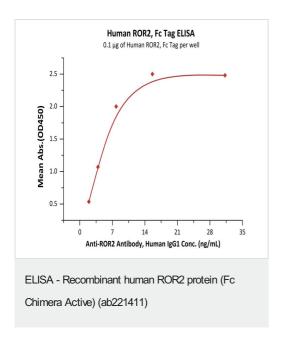

**Cellular localization** Cell membrane.
