Product datasheet

Reactive Oxygen Species (ROS) Detection Assay Kit
ab287839

Overview

Product name: Reactive Oxygen Species (ROS) Detection Assay Kit
Detection method: Flow cytometry-fluorescent
Sample type: Adherent cells, Suspension cells
Assay type: Quantitative
Assay duration: Multiple steps standard assay

Product overview

Constant generation of low levels of reactive oxygen species (ROS) and free radicals is a basic feature of all living cells. Low levels of ROS play an essential role in signaling pathways, whereas increased levels under oxidative stress, results in damage to nucleic acids, proteins and membrane lipids. Accumulation of ROS during oxidative stress is also associated with aging, apoptosis or necrosis, and is implicated in pathological conditions such as vascular diseases, diabetes, renal ischemia, arteriosclerosis, pulmonary disorders, inflammatory diseases, and cancer. Cellular activity of ROS is offset by antioxidants, numerous repair systems, and replacement of damaged DNA. Probes for measuring intracellular ROS levels provide important tools to study oxidative stress inducers and effects of antioxidant therapies. The ROS Detection Assay Kit ab287839 is designed for the detection of hydroxyl, peroxy, or other reactive oxygen species in live cells. We utilize H2DCFDA, a unique cell-permeable fluorogenic probe compatible with phenol red, FBS and BSA to detect reactive oxygen species in live cells. Upon the cell entry, H2DCFDA is modified by cellular esterases to form a non-fluorescent H2DCF. Oxidation of H2DCF by intracellular ROS yields highly a fluorescent product that can be detected by FACS, microplate reader, or fluorescence microscope (Ex/Em 495/529 nm). The fluorescence intensity is proportional to the ROS levels. Our kit provides a simple and specific assay for the real-time measurement of global levels of ROS in living cells. We include sufficient reagents to perform 100 assays and a common ROS inducer as control for the measurement of ROS levels or antioxidant activity with high sensitivity, specificity and accuracy.

Tested applications

Suitable for: FM, Functional Studies

Platform

Flow cytometer, Fluorescence microscope

Properties

Storage instructions: Store at -20°C. Please refer to protocols.
The Abpromise guarantee

Reactive Oxygen Species (ROS) Detection Assay

Kit Oxidative Stress Analysis

Live cells labeled and treated with ROS Inducer and 100 µM of H₂O₂ according to the kit protocol.

2 x10⁴ Jurkat cells per condition were analyzed by FACS. Plotted intensity values show a significant increase in ROS production between treatments and controls.

Reactive Oxygen Species (ROS) Detection Assay

Kit Oxidative Stress Analysis
Live cells labeled and treated with ROS Inducer and 100µM of H$_2$O$_2$ according to the kit protocol.

1x10$^5$ Jurkat cells were analyzed on a plate reader. Mean+/− standard deviation plotted for 3 replicates per condition.

Figure: Analysis of oxidative stress in live cells based on ROS staining. Live cells labeled and treated with ROS Inducer and 100 µM of H$_2$O$_2$ according to the kit protocol. B. 1x10$^5$ Jurkat cells analyzed on a plate reader. Mean+/− standard deviation plotted for 3 replicates per condition.

Please note: All products are "FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
• Extensive multi-media technical resources to help you
• We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

• Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
