Recombinant Human Interferon gamma protein
ab51240

Product name: Recombinant Human Interferon gamma protein
Protein length: Full length protein

Nature: Recombinant
Source: Escherichia coli
Species: Human

Amino Acid Sequence:
MQDPYVKEAE NLKKYFNAGH SDVADNGTLF
LGILKNWKEE SDRKIMQSQI VSFYFKLFKN
FKDDQSLQKS VETIKEDMNV KFFNSNKKKR
DDFEKLTNYS VTDLNVQRKA IHELIQVMAE
LSPAAKTGKR KRSQMLFRGR RASQ

Applications:
SDS-PAGE
Western blot

Purity: > 95% SDS-PAGE.
Recombinant human Interferon gamma was expressed in *E. coli* and purified by FPLC gel-filtration chromatography, after refolding of the isolated inclusion bodies in a renaturation buffer.

Form: Liquid

Stability and Storage:
Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles.
Preservative: None
Constituents: PBS, pH 7.4

Our Abpromise guarantee covers the use of **ab51240** in the following tested applications. The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.
### General Info

<table>
<thead>
<tr>
<th>Function</th>
<th>Produced by lymphocytes activated by specific antigens or mitogens. IFN-gamma, in addition to having antiviral activity, has important immunoregulatory functions. It is a potent activator of macrophages, it has antiproliferative effects on transformed cells and it can potentiate the antiviral and antitumor effects of the type I interferons.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tissue specificity</td>
<td>Released primarily from activated T lymphocytes.</td>
</tr>
<tr>
<td>Involvement in disease</td>
<td>In Caucasians, genetic variation in IFNG is associated with the risk of aplastic anemia (AA) [MIM:609135]. AA is a rare disease in which the reduction of the circulating blood cells results from damage to the stem cell pool in bone marrow. In most patients, the stem cell lesion is caused by an autoimmune attack. T-lymphocytes, activated by an endogenous or exogenous, and most often unknown antigenic stimulus, secrete cytokines, including IFN-gamma, which would in turn be able to suppress hematopoiesis.</td>
</tr>
<tr>
<td>Sequence similarities</td>
<td>Belongs to the type II (or gamma) interferon family.</td>
</tr>
<tr>
<td>Post-translational modifications</td>
<td>Proteolytic processing produces C-terminal heterogeneity, with proteins ending alternatively at Gly-150, Met-157 or Gly-161.</td>
</tr>
<tr>
<td>Cellular localization</td>
<td>Secreted.</td>
</tr>
</tbody>
</table>

### Images

**Sandwich ELISA - Recombinant Human Interferon gamma protein (ab51240)**

Standard curve for Interferon gamma (Analyte: ab51240); dilution range 1pg/ml to 1µg/ml using Capture Antibody ab25014 at 5µg/ml and Detector Antibody ab25101 at 0.5µg/ml.

**SDS-PAGE - Recombinant Human Interferon gamma protein (ab51240)**

ab51240 on 14% SDS-PAGE.
Western blot - Recombinant Human Interferon gamma protein (ab51240)

Please note: All products are "FOR RESEARCH USE ONLY AND ARE NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE"

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
