Product datasheet

Anti-Serum Amyloid A antibody [115] ab687

Overview

Product name: Anti-Serum Amyloid A antibody [115]
Description: Mouse monoclonal [115] to Serum Amyloid A
Host species: Mouse
Tested applications: Suitable for: WB, Sandwich ELISA
Species reactivity: Reacts with: Human
Immunogen: Highly purified recombinant human serum amyloid A (MW: 12 kDa).
General notes: This product was changed from ascites to tissue culture supernatant on 6th March 2018. Please note that the dilutions may need to be adjusted accordingly. If you have any questions, please do not hesitate to contact our scientific support team.

Properties

Form: Liquid
Storage instructions: Shipped at 4°C. Upon delivery aliquot and store at -20°C or -80°C. Avoid repeated freeze / thaw cycles.
Storage buffer: Constituent: PBS
Purification notes: Affinity purified from tissue culture supernatant.
Clonality: Monoclonal
Clone number: 115
Myeloma: unknown
Isotype: IgG1
Light chain type: kappa

Applications

Our Abpromise guarantee covers the use of ab687 in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.
Function: Major acute phase reactant. Apolipoprotein of the HDL complex. Tissue specificity: Expressed by the liver; secreted in plasma. Disease: Note=Reactive, secondary amyloidosis is characterized by the extracellular accumulation in various tissues of the SAA protein. These deposits are highly insoluble and resistant to proteolysis; they disrupt tissue structure and compromise function. Note=Elevated serum SAA protein levels may be associated with lung cancer. Similarity: Belongs to the SAA family. PTM: This protein is the precursor of amyloid protein A, which is formed by the removal of approximately 24 residues from the C-terminal end.

### Images

**All lanes**: Anti-Serum Amyloid A antibody [115] (ab687) at 1/4000 dilution

**Lanes 1-4**: Acute phase plasma samples
**Lane 5**: Recombinant C-SAA
**Lane 6**: Recombinant A-SAA

Lysates/proteins at 14 µg per lane.

**Secondary**

**All lanes**: Goat anti-mouse IgG-HRP at 1/10000 dilution

Developed using the ECL technique.

**Exposure time**: 5 seconds

Our Abpromise to you: Quality guaranteed and expert technical support

- Replacement or refund for products not performing as stated on the datasheet
- Valid for 12 months from date of delivery
- Response to your inquiry within 24 hours
- We provide support in Chinese, English, French, German, Japanese and Spanish
- Extensive multi-media technical resources to help you
- We investigate all quality concerns to ensure our products perform to the highest standards

If the product does not perform as described on this datasheet, we will offer a refund or replacement. For full details of the Abpromise, please visit https://www.abcam.com/abpromise or contact our technical team.

Terms and conditions

- Guarantee only valid for products bought direct from Abcam or one of our authorized distributors
