Reproducibility is key to advancing scientific discovery and accelerating scientists' next breakthrough.

Abcam is leading the way with our range of recombinant antibodies, knockout-validated antibodies and knockout cell lines, all of which support improved reproducibility.

We are also planning to innovate the way in which we present recommended applications and species on our product datasheets, so that only applications & species that have been tested in our own labs, our suppliers or by selected trusted collaborators are covered by our Abpromise™ guarantee.

In preparation for this, we have started to update the applications & species that this product is Abpromise guaranteed for.

We are also updating the applications & species that this product has been “predicted to work with,” however this information is not covered by our Abpromise guarantee.

Applications & species from publications and Abreviews that have not been tested in our own labs or in those of our suppliers are not covered by the Abpromise guarantee.

## Applications

Our [Abpromise guarantee](#) covers the use of **ab58975** in the following tested applications.

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

Application	Abreviews	Notes
WB		Use a concentration of 0.1 - 0.2 µg/ml. Predicted molecular weight: 46 kDa. Used in conjunction with compatible secondary reagents the detection limit for recombinant Vaspin is 1.5 - 3.0 ng/lane, under either reducing or non-reducing conditions.
Sandwich ELISA		Use a concentration of 0.25 - 1 µg/ml. (Direct or Sandwich) Use at a concentration of 0.25 - 1 µg/ml, at 100µl per well. This allows the detection of at least 0.2 - 0.4 ng/well of recombinant Vaspin.

## Target

<b>Function</b>	May modulates insulin action conceivably only in the presence of its yet undefined target proteases in white adipose tissues.
<b>Tissue specificity</b>	Expressed in visceral adipose tissues.
<b>Sequence similarities</b>	Belongs to the serpin family.
<b>Cellular localization</b>	Secreted.
